

## Wiremold-style Module

The new 2-port keystone module provides keystone flush mounting in 3 standard Wiremold colors: gray, ivory and white. Available in a 2-port configuration only this new HWM2K module accommodates HPW's extensive line of audio, data, video and voice Snap Fit connectors in a "snap". The new HWM2K module is 1 unit in size and can be configured with all Wiremold Activate System plates, frames and openings.

### Wiremold-style Module

Color	Ports	Packaging	Catalog No.
White	2	10-Pack	<b>HWM2KW10</b>
Gray	2	10-Pack	<b>HWM2KGY10</b>
Ivory*	2	10-Pack	<b>HWM2KI10</b>

\* Ivory is Wiremold's equivalent of HPW's Office White.

## Wall Phone Plates

The stainless steel 630 series wall phone plates have been designed for use with wall mount telephones. The 630 series phone plates provide corrosion-resistance, durability and will mount to any standard single-gang box.

The 630 series wall phone plates are available in 2 styles and 6 variations: a flat, flush mount style and a slight recess style. The flat style allows 6-position USOC and Cat 5e jacks to flush mount with the plate. The slight

recess allows the modular jack to extend out from the plate and mate with phone's sliding rail plug.

### FEATURES

- Material: 430 stainless steel
- Studs mounted in standard positions to accommodate any standard wall phone
- Mounts to any standard, single-gang wall box

## International Plates

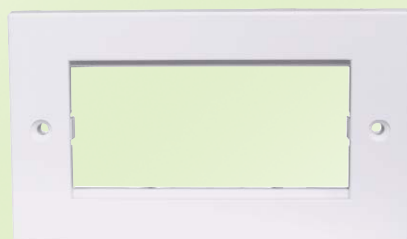

Hubbell's International frames and modules provide angled, flat, shuttered and un-shuttered modular configurations compatible with 25mm wall boxes. These attractive plates deliver field-configurable mounting for HPW's extensive line of XJ and SJ series jacks as well as SF connectors. The angled modules house a clear covered label field allowing identification of each location.

Our offering of traditional British-style plates is available in 1- and 2-port configurations in shuttered and un-shuttered versions. Plates are supplied with voice, data, and plain icons and clear-covered label fields to further assist with port identification.
