## Our Business

Brand-Rex, a Leviton Group company, is a leading global supplier of structured cabling systems for data networks, as well as high performance cables for extreme environment applications.

Brand-Rex provides complete cabling systems that connect the IT equipment in offices and Data Centres – from patch cords and wall outlets seen in the office, to cable running under floors and above ceilings, to connectivity panels that interface with active equipment in the IT room. Within vast Data Centres, hosting huge amounts of business-critical information, Brand-Rex offers industry-leading, high-speed and high-density solutions.

## Our Company

Brand-Rex Limited was established in 1972, in Glenrothes, Scotland, where the company's head office remains today. In 2015, Brand-Rex became part of the Leviton Group, a privately owned US manufacturing company specialising in electrical wiring devices, energy management, security and automation, and data network solutions for industry and commerce.

The core technologies provided by Brand-Rex include copper-based cabling systems, fibre optic cabling systems (including a unique air-blown fibre system) and an Intelligent Infrastructure & Management Solution that delivers full visibility and management capability to end user clients.

Brand-Rex solutions are delivered to market through a network of high-calibre service and installation partners. The company uses distribution specialists and an army of trained, accredited installers who ensure that the correct system solutions are deployed and installed every time. The company also engages with end users and their consultants directly to ensure the best mutual understanding of needs and capabilities is achieved.

## Best in Class Manufacturing

Brand-Rex has long been known for its high quality manufacturing capabilities.

Having declared a commitment to maintaining cable production within the UK, Brand-Rex has invested £10 million in the creation of a new data cabling factory at the Glenrothes site enabling the company to compete on the global stage against manufacturers in lower cost countries. The investment program has resulted in a factory that can rival any in the world.

This manufacturing facility and the 'High Performance Cable' plant at Leigh, near Manchester, both hold ISO 9001:2008 quality certification and environment accreditation to ISO:14001:2004.

## Customer Service

Our mission is to be a market leader in Customer Service. As member of The Institute of Customer Service, we know the benchmark that we must surpass. We are implementing rigorous assessment and training within every area of our business to ensure that no matter what we do, Brand-Rex is determined to exceed your expectations.

## Technology Leader

With an experienced, dedicated and expert design and development team, Brand-Rex is a strong and capable force that continues to challenge industry conventions.

Through sophisticated modelling techniques and advanced test laboratories, Brand-Rex has been able to develop some of the most sophisticated cable and connectivity solutions available.

The New Product Development process that Brand-Rex deploys is a rigorous one. This process entails technology forecasting, customer clinics, competitor analysis, cross-functional teams and, of course, continued investment.

Brand-Rex's technical expertise is further evidenced through representation on standards committees, products that stand up to 3rd party scrutiny, a significant patents portfolio, industry-recognised training courses and professional engagement with the industry's leading consultants.

## Technical Service and Support

Brand-Rex has a dedicated and experienced technical support team that is led from head office and located throughout the world to support our global customers.

This team's purpose is to deliver training and technical support to installation partners and end users in the design, deployment and commissioning of their high-performance data networks.

The comprehensive training and accreditation of installers, combined with validation of installation test results, allows Brand-Rex to offer end users a 25-year product and lifetime application warranty that remains one of the best in the industry.

## Superior performance

Increased focus on online services, storage and instant accessibility of information have resulted in a dramatic increase in application size and data transfer rates. These applications are complex and require higher bandwidth, leading to the introduction of 10, 40 and 100G technology. Brand-Rex connectivity solutions have evolved to meet these requirements, including the adoption of plug and play solutions and low loss HI-DEX connectivity to ensure a seamless migration to higher speed Ethernet.

## Flexibility

Brand-Rex solutions are designed to support all elements of enterprise networks across an extensive range of work areas and unique requirements. It is critical that infrastructure design supports current and future applications.

## Faster installation

Whilst technologies continue to grow at an exponential rate, installation practices have been slower to evolve. Legacy often dictates that familiar products and processes offer reassurance; however the drive for more efficient and financially feasible solutions is changing that rationale. Delivering significant savings in time and money, pre-terminated copper and fibre solutions have become a viable and attractive option for maximising return on investment. Simplifying the 'Smart Design' premise and using premium quality 'factory tested' performance providing improved operational efficiency.

## Proven reliability

The focus on reliability, increased density and modularity during installation and throughout the life of the project is paramount. Superior and consistent performance is achieved using process capability to control the repeatability and consistency of the manufacturing process to ensure long-term reliability and optimal application performance. For additional peace of mind our systems are supported by our leading 25 year system warranty.

## Sustainability

Brand-Rex is dedicated to reducing its impact on the environment and offers sustainable solutions. As part of this commitment Brand-Rex achieved Carbon Neutral status for its Global organisational and operational activities in accordance to the PAS2060 and ISO14064 standards.

As a leading network infrastructure manufacturer we understand the environmental impact of our operations, that's why we are committed to reducing our impact on the environment by utilising sustainable energy sources and materials to manufacture sustainable solutions.

Brand-Rex was not only the first network infrastructure company to achieve carbon neutral status for its global operations, but also the first to introduce a range of Carbon Neutral products.

The production of cable consumes energy and creates emissions. Brand-Rex is passionate about manufacturing and the environment and is doing everything possible to reduce its impact on the environment and to offer customers sustainable solutions for the future.

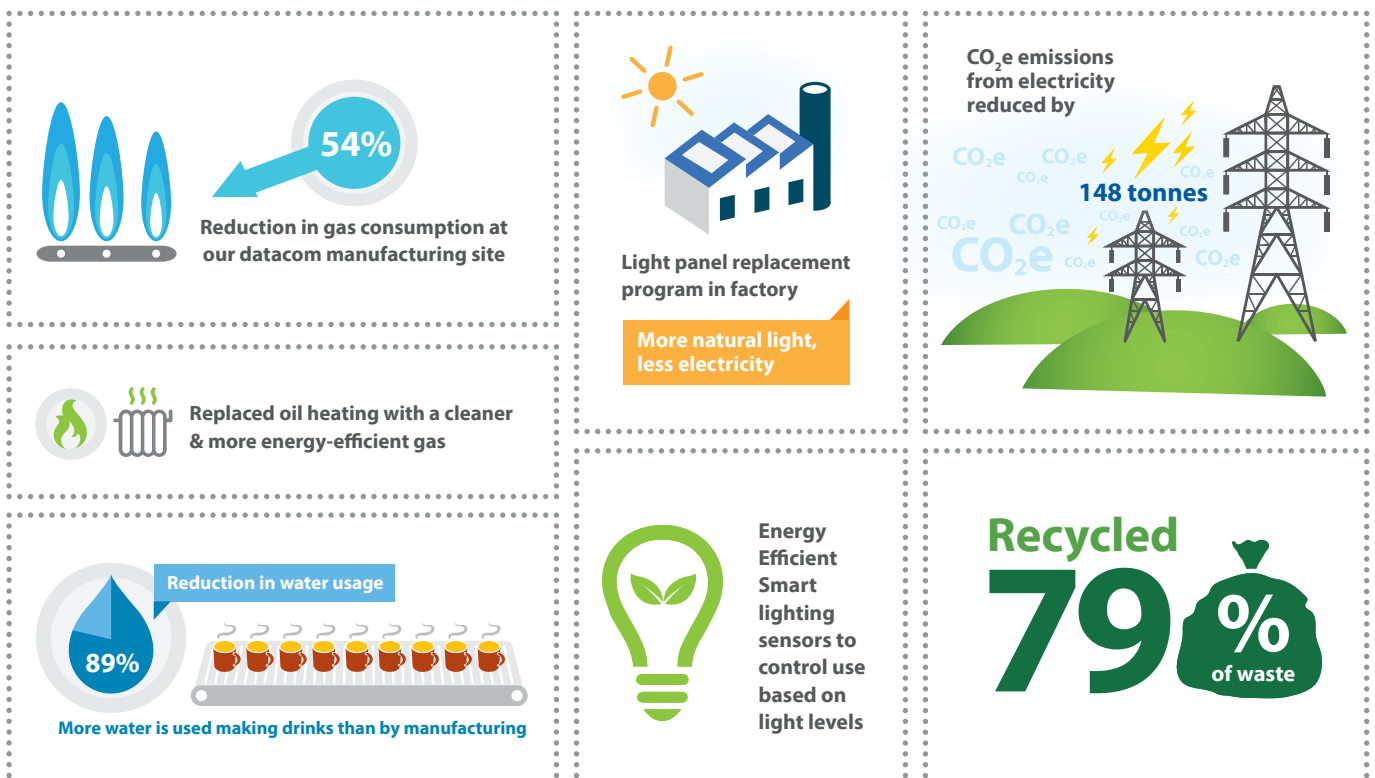

Customer demand for more sustainable practises and solutions is also growing as the world begins to see it as a worthwhile policy to pursue. In turn many companies are recognising the clear environmental and financial benefits gained by adopting a sustainable approach.

Rising energy and materials costs are a threat to all businesses. Electricity is estimated to rise a further 37%\* by 2020 and since 2009, fuel and gas has risen by 53%. There are clear financial benefits of implementing sustainable strategies, which all businesses should consider. Even more so with the growing support for carbon taxes and the introduction of mandatory carbon footprinting in countries such as the UK.

### Achieving the PAS2060 standard and becoming Carbon Neutral allowed Brand-Rex to:

- Reduce greenhouse gas emissions and quantify our carbon footprint
- Identify and improve areas to make efficiencies and improve performance
- Generate sustainable cost savings by reducing energy consumption
- Meet international standards with an accurate carbon neutrality statement
- Meet our customers, stakeholder and legal expectations

## Global Standardisation

Develop new application standards for Ethernet technologies

Develop international standards for Structured Cabling, Cables, Components & Testing

Develop European standards for Structured Cabling, Cables & Testing

Represent European Cablemakers to lobby the EU and act as authority on technical issues

Develop US national standards for Structured Cabling, Cables, Components & Testing

Develop UK national standards for Structured Cabling

Promotes Fibre Optic industry worldwide

Advancement of Ethernet technologies

## Setting tomorrow's standards today

Brand-Rex works in partnership with a number of professional associations. These bodies shape the standards of data communication and cabling systems.

**Our participation with these global organisations allows us to influence:**

- Higher speed applications standards
- Structured wiring cabling performance levels
- Technology solutions for fibre optical transmissions
- Regulations affecting product performance, requirements and raw materials

Customers can be confident that our products and solutions comply with international standards and that we are influencing the future of emerging technologies.

Brand-Rex is active in development of new standards, participation in new technologies and liaises with industry associations.

## The Brand Rex Product Range

### **10GPlus**

An extensive range of premium Class E<sub>A</sub> performance level, shielded and unshielded, network infrastructure. Designed to transmit 10GBASE-T applications.

### **Cat6Plus**

A wide range of Class E performance structured cabling products to support Category 6 enterprise applications.

### **GigaPlus**

GigaPlus provides a secure, cost effective and flexible Class D cabling system solution for running today's LAN protocols and high speed applications such as 1000Base-T.

### **U-MediaPlus**

A range of universal media cables that exceed the Class F and Class F<sub>A</sub> requirements of ISO/IEC 11801 and EN 50173-1.

### **FibrePlus**

An extensive range of Optical Fibre cables and connectivity designed to support the varied and challenging requirements of the educational facilities.

### **Blolite**

The Blolite system was one of the first Air Blown Fibre systems and the only single blowing fibre solution on the market. It is now regarded as the 'industry standard'.

### **HI-DEX**

An ultra high performance, pre-terminated, modular, Optical Fibre cabling system based on MT ferrule connector technology. Pre-terminated solutions are designed for quick installation as well as change and repair to support modular builds. Ideal for duplex fibre technology and ready for new parallel optics technologies

### **SmartPatch**

An industry leading intelligent infrastructure management system designed to monitor and manage physical network connections.

## High Performance Products

The High Performance Cabling business based in Leigh near Manchester, is a leading supplier of copper and optical cabling products for demanding environments. Brand-Rex has an extensive heritage as a bespoke cable manufacturer in high performance markets.

Our experience covers markets such as Aerospace, Automotive, Rail, Defence, Marine and Industrial. We pride ourselves in maintaining 'blue chip' customers across these areas. Our materials and cabling capability are extensive. In our Leigh facility we use high performance thermoplastic, elastomer and thermo-polymer insulations and sheathing materials, conductors and other components such as metallic and textile braids and armours. Our processing capability covers extruding, taping and radiation cross-linking.

## 25 Year Warranty

Brand-Rex understands the importance of supporting end customers, that is why we offer a full industry leading 25-year Systems warranty to installations completed by approved partners.

The comprehensive training and accreditation of installers, combined with validation of installation test results, allows Brand-Rex to offer end users a 25-year product and lifetime application warranty that remains one of the best in the industry.

## Third Party Verification

Brand-Rex solutions are designed by an, in-house team, to exceed industry standards. Brand-Rex uses independent 3rd party certification of its products as a further assurance for our customers that the products meet the international standards. Brand-Rex has been approving cables and components with test houses for over 20 years, building strong working relationships and mutual respect, these tests houses include:

3P, Hørsholm, Denmark, [www.3ptest.dk](http://www.3ptest.dk)  
Delta, Hørsholm, Denmark, [www.delta.dk](http://www.delta.dk)  
GHMT, Bexbach, Germany, [www.ghmt.de](http://www.ghmt.de)

Whilst independent approval gives the end user greater confidence in the cable, component or cabling system they choose to install, the performance and quality is assured by Brand-Rex and its operations.

## Brand-Rex Website

The Brand-Rex website is a wealth of valuable information including:

- Technical product datasheets
- Literature
- Whitepapers
- Case studies
- Tools and calculators
- Video library

## Technical Datasheets

Comprehensive technical datasheets exist for each product in the Brand-Rex range. These can be found in the product section of the website and are updated regularly.

They contain:

- Product features
- Applicable standards
- Material identification
- Electrical parameters and performance
- Optical parameters and performance
- Print and packaging specifications

All product datasheets can be viewed at:  
[www.brand-rex.com/datasheet](http://www.brand-rex.com/datasheet)

## Business Partner Portal

This area contains tailored content not otherwise available to customers out with the Brand-Rex programme, including unique access to launch information/collateral, presentations, images, 3D models, brochures, datasheets, logos, web banners and more.

The portal provides partners with exclusive tools to help effectively promote Brand-Rex as well as provide the required support to evolve the relationship between Brand-Rex and its partners.

### Unique information includes:

- Installation guides
- Warranty system
- Marketing campaign resources
- Third party certificates
- Product launch information
- Image/logo library

Structured cabling systems have to cope with the ever-growing demands of increasing bandwidth absorption within the local area network. All Brand-Rex copper systems provide the IT Manager with a complete open cabling system from the point of entry, to building distribution, to floor distribution, to wiring closet, to wall outlets, and ultimately to the desk.

The Brand-Rex product range is system based, with each solution containing a full connectivity. Comprising of cable, patch panels, wall outlets and patch cords, the range supports all LAN applications including VoIP and Power over Ethernet.

**A premier grade cabling system** needs standards compliant components, and that is what Brand-Rex systems offer. This is demonstrated through overall link and channel performance. GigaPlus, Cat6Plus and 10GPlus components are engineered to achieve **guaranteed channel performance**.

**Brand-Rex Copper Systems support all the protocols** defined in the international standards including:

- broadband and ISDN
- ATM up to 1.2Gbps
- Ethernet speeds up to 10GBASE-T (IEEE 802.3an)
- 1, 2 and 4G Fibre Channel

**Third party independent certificates** of compliance are available for component and channel performance from 3P Testing and GHMT Laboratories GmbH for GigaPlus, Cat6Plus, 10GPlus and U-MediaPlus.

- GigaPlus exceeds the requirements of ISO/IEC 11801 and EN 50173-1 for Class D channels and ANSI/TIA/EIA 568C Category 5e.
- Cat6Plus exceeds the requirements of ISO/IEC 11801 and EN 50173-1 for Class E channels and ANSI/TIA/EIA 568C Category 6.
- 10GPlus exceeds the requirements of ISO/IEC 11801 and EN 50173-1 for Class E<sub>A</sub> channels and ANSI/TIA/EIA 568C Augmented Category 6.
- U-MediaPlus is a range of universal media cables that exceed the Category 7 requirements of ISO/IEC 11801 Class F and EN 50173-1 and Class F<sub>A</sub>.

#### AUGMENTED CATEGORY 6 SYSTEM

10 Gigabit Ethernet over copper cabling systems have been heralded as the greatest technological revolution in networking since the birth of Ethernet.

The engineering science dedicated to overcoming the boundaries of convention should not be underestimated. Brand-Rex has dedicated a team of design engineers, technologists and laboratory technicians to developing the highest performance 10 Gigabit Ethernet solution on the market today.

#### High performance businesses need high performance networks

The use of increasingly sophisticated IT applications in modern, competitive business has driven the growth of Ethernet. What value is an enterprise application if the network hardware cannot support it? Whether your business uses demanding graphics based design packages, data hungry finance systems or emerging multi-media communication tools, they have one thing in common, a need for:

- Greater bandwidth
- Maximum transmission reliability
- Life long quality of operation
- Resilience against environmental challenges

10 Gigabit Ethernet provides the next standard platform that will allow the continued growth of high performance business applications. Powerful IT networks, able to deliver the new 10GBASE-T protocol, require phenomenal processing power within active network switching and routing hardware. Such active hardware commands a very high price.

Yet this investment is pointless unless supported by an equally sophisticated cabling system. It is vital that you can trust the claims of any 10 Gigabit Ethernet cabling system since the choices made today will impact the business applications of tomorrow.

> UNSHIELDED

**Communication Cable, U/UTP, 100 Ω, 4x2xAWG 23/1**

10GPlus U/UTP, 100 Ω, 4x2,AWG23/1 is a premium grade Class E<sub>A</sub> / Augmented Category 6 cable to support 10 Gigabit Ethernet protocol for installation in horizontal and backbone applications. Fire safety rating: HF1 = IEC 60332-1-2, HF3 = IEC 60332-3-24, HF3-22 = IEC 60332-3-22.

Part Number	Length (m)
AC6U-HF1-500VT	500
AC6U-HF1-1000VT	1000
AC6U-HF3-500BU	500
AC6U-HF3-1000BU	1000
AC6U-HF3-22-500GN	500

VT = Violet BU = Blue GN = Green

**Cable Standards**

The cable is compliant with: ISO/IEC 11801, IEC 61156-5, EN 50173-1 and EN 50288-11-1. The cable is fully backwards compatible with Category 5 and Category 6 systems. Halogen Free Flame Retardant Low Smoke (HFFR-LS) cable types (LSHF) meet IEC 60754-2 and IEC 61034.

> SHIELDED

**Communication Cable, F/FTP, 100 Ω, 4x2xAWG 23/1**

10GPlus F/FTP, 100 Ω, 4x2xAWG 23/1 is a premium grade Class E<sub>A</sub> / Augmented Category 6 cable to support 10 Gigabit Ethernet protocol for installation in horizontal and backbone areas. Fire safety rating: HF1 = IEC 60332-1-2, HF3 = IEC 60332-3-24.

Part Number	Length (m)
AC6F/FTP-HF1-500VT	500
AC6F/FTP-HF1-1000VT	1000
AC6F/FTP-HF1-D500VT	500

VT = Violet BU = Blue Rlx = Reuleaux

**Cable Standards**

The cable is compliant with:  
IEC 61156-6 and EN50288-10-2.  
Halogen Free cable types (LSHF) meet IEC 60754-2 and IEC 61034.

**Augmented Category 6 Server Patch Cords**

The Augmented Category 6 patch cord is part of the Brand-Rex 10GPlus cabling system. The 10GPlus cabling system is comprised of high performance cables and connectivity which not only provide a reliable platform for all of today's network applications, but is also designed to future-proof networks for the emerging, new higher speed protocols of tomorrow, such as 10GBASE-T. The 10GPlus system is classified as an Augmented Category 6 and Class E<sub>A</sub> product set that is fully backwards compatible to Category 6 (Class E) and Category 5e (Class D) products.

Description	Red	Blue	Green	Yellow	Grey

**Augmented Category 6 Snap-in-Jack Panel**

The Augmented Category 6 Snap-in-Jack panel is part of the Brand-Rex 10GPlus cabling system.

Description	Part Number
24 Port Modular Snap-in-Jack Panel - Grey	MMCPNLX24SU2M-B
24 Port Modular Snap-in-Jack Panel - Black	MMCPNLX24SU8M-B

**Augmented Category 6 1U 24 Port Patch Panel**

The 10GPlus 19" rack mounted 1U 24 port patch panel delivers true Augmented Category 6/Class E<sub>A</sub> performance and is ideal for Data Centre applications. The robust patch panel features 4 easy to remove shielded modular units each comprising of 6 ports. To assure optimum link performance the panel has been designed with integrated rear cable management to provide easy routing and strain relief. Ports are numerically identified and offer maximum space for ease of port numbering and panels are supplied with cable ties, panel mounting kit and earth cable. All panels are also backwards compatible.

**Applicable Product Standards**

Augmented Category 6 and Class E<sub>A</sub> ISO/IEC 11801 Ed 2.2 , IEC 60603-7-51 and ANSI/TIA 568-C.2

Description	Part Number
10GPlus 1U Shielded 24 Port Patch Panel - Black	AC6PNLF240K2M
10GPlus 1U Shielded 24 Port Patch Panel - Grey	AC6PNLF240K8M
10GPlus Replacement Panel Module - Metallic	AC6CPF060K

**Augmented Category 6 Half U 24 Port Patch Panel**

The 10GPlus 19" rack mounted 1/2U 24 port patch panel delivers true Augmented Category 6/Class E<sub>A</sub> performance and is ideal for Data Centre applications. The robust patch panel features 4 easy to remove shielded modular units each comprising of 6 ports. To assure optimum link performance the panel has been designed with integrated rear cable management to provide easy routing and strain relief. Ports are numerically identified and offer maximum space for ease of port numbering and panels are supplied with cable ties, panel mounting kit and earth cable. All panels are also backwards compatible.

**Applicable Product Standards**

Augmented Category 6 and Class E<sub>A</sub> ISO/IEC 11801 Ed 2.2 , IEC 60603-7-51 and ANSI/TIA 568-C.2

Description	Part Number
10GPlus 1/2U Shielded 24 Port Patch Panel - Black	AC6PNLF240K2H
10GPlus 1/2U Shielded 24 Port Patch Panel - Grey	AC6PNLF240K8H
10GPlus Replacement Panel Module - Metallic	AC6CPF060K

**Augmented Category 6 Consolidation Point Module**

The 10GPlus Consolidation Point Module offers true Augmented Category 6/Class E<sub>A</sub> Performance and is as flexible solution, ideal for use in the open office environment. Each module comprises of 6 RJ45 ports and can be supplied as a low profile stand alone module or with mounting bracket. The mounting bracket option allows for secure fixing to walls, ceilings and under floors, it also features cable tie points for added security. The cover can easily be removed to gain access to the LSA IDC's for termination. An area on top of the cover is available for port identification. All modules are backwards compatible for Cat5e and Cat6 systems. The module base and cover are made from a lightweight construction which offers excellent shielding characteristics.

**Applicable Product Standards**

Augmented Category 6 and Class E<sub>A</sub> ISO/IEC 11801 Ed 2.2 , IEC 60603-7-51 and ANSI/TIA 568-C.2

Description	Part Number
10GPlus Consolidation Point Module - 6 Way - Metallic	AC6CPF060K
10GPlus Consolidation Point Module with mounting bracket - 6 Way - Metallic	AC6CPF060KM
10GPlus 1/2U Patch Panel Chassis Only	AC6PNLC240K2H
10GPlus 1/2U Patch Panel Chassis Only	AC6PNLC240K8H
10GPlus 1U Patch Panel Chassis Only	AC6PNLC240K2M
10GPlus 1U Patch Panel Chassis Only	AC6PNLC240K8M

### Augmented Category 6 Shielded Tool-free Snap-in-Jack

The Augmented Category 6 fully shielded jack has been designed with an emphasis on taking the time out of termination. Its ease of use ensures it is one of the most intuitive products on the market, coupled with its exceptional electrical performance makes it the only choice for your network.

#### Applicable Product Standards

ISO/IEC category: Category6A performance connector for use in Class EA cabling systems. ISO/IEC 11801 ed 2.2 (2011), IEC 60603-7, 7-1, 7-51, EIA/TIA 568C series: Category 6A performance

Description	Part Number
Augmented Category 6 Shielded Tool-free Jack	AC6JAKS000DC

### Augmented Category 6 Snap-in-Jacks

The 10GPlus Snap-in-Jack offers true Class E<sub>A</sub> component performance using a patented contact array design. The 10GPlus system is classified as an Augmented Category 6 and Class E<sub>A</sub> product set that is fully backwards compatible to Category 6 (Class E) and Category 5e (Class D) products. The jack is also fully compatible with all our UK and Continental style faceplates and products.

#### Applicable Product Standards

ISO/IEC category: Category6A performance connector for use in Class EA cabling systems. ISO/IEC 11801 ed 2.2 (2011), IEC 60603-7, EIA/TIA 568C series: Category 6A performance

Description	Part Number
10GPlus Unshielded Snap-in-Jack - Black	AC6JAKUOK2
10GPlus Unshielded Snap-in-Jack - White	AC6JAKUOK3
10GPlus Shielded Snap-in-Jack - Metallic	AC6JAKFOK2

### Augmented Category 6 Unshielded Tool-free Jack

When used within a channel the tool-free jack provides an industry leading electrical performance and is fully compatible with Brand-Rex UK and continental UNI style faceplates and products. The jacks come supplied in boxes of 12; termination instructions are on the rear of the box. No termination tool is required. Each jack has integral colour code wiring labels.

#### BRAND-REX CATEGORY 7 AND 7<sub>A</sub> CABLING

Designed for use in Class F and F<sub>A</sub> systems and backwards compatible to lower classes.

##### Key Features

- U-MediaPlus is a range of universal media cables that exceed the Category 7 and Category 7<sub>A</sub> requirements of ISO/IEC 11801 and EN 50173-1.
- Third party independent certificates of compliance (from 3P) are available.

- Provides a foundation for supporting high bandwidth and high frequency multi-media broadcast applications. Suitable for cable sharing applications.
- Highest electrical performance provided by individual screening of balanced cable pairs.

- Suitable for use in high data rate LAN systems and for providing a platform for transmissions of multi-media and broadcast technologies.

#### BRAND-REX CAT6PLUS SYSTEM (CATEGORY 6 - CLASS E)

##### Key Features

- Cat6Plus is a Class E, Category 6 performance cabling system, it is interoperable with standards compliant products and fully backwards compatible to lower performances classes. Third party independent certificates of compliance are available for cables, component and channel performance from 3P Testing and GHMT Laboratories GmbH.
- The performance headroom provided by Cat6Plus makes it a reliable and safe choice of cabling to support Gigabit Ethernet.
- 1000BASE-T will operate with a lower bit error rate given the extra margin afforded by Cat6Plus.
- Cat6Plus shielded systems will support 10GBASE-T in any channel configuration. (Subject to testing to IEC TR 24750).
- Cat6Plus supports broadband video applications up to 550MHz.
- Cat6Plus supports Power over Ethernet (PoE and PoEP) applications including:
  - VoIP
  - WLAN access points
  - Security cameras etc
- The system is available in both shielded and unshielded options.

> UNSHIELDED

Category 6 Patch Cords

Cat6Plus patch cords enable you to get the optimum performance from your cabling system. Our factory made and tested patch cords offer you guaranteed quality, and ensure that your system avoids the performance degradation which inferior alternatives will give you at high data rates. All patch cords are supplied with boots and ID tag.

Category 6 Panel with cable management

The Cat6Plus 19" rack mounted patch panel offers true Category 6 component performance using a new patented contact pin array design. All panels are backwards compatible. The modular jacks that are used in blocks of 8 are individually shielded to give superior shielding. In addition to this, each panel has been designed with a cable management/ strain relief feature built into the rear. All outlets are numerically identified with an additional writable surface for ease of port naming. Each panel is supplied with cable ties, panel mounting accessories and short form installation instructions.

Applicable Product Standards

**Category 6 Half U 24 Port Patch Panel**

The Cat6Plus 19" rack mounted ½U 24 Port Shielded and Unshielded patch panels offer a port density which delivers 48 terminations in a single U height with true Category 6 component performance using a patented contact pin array design. The robust and easy to install patch panel employs a conventional termination method that affords the installer the maximum punch down accessibility for wire termination. To assure the optimum link performance the panel has been designed with integral rear cable management which provides easy routing and strain relief for the high performance cabling. The shielded version of the ½U patch panel introduces shielded mounting clips to assure optimum earthing of the cable screens.

**Cross Connect Tower Unit and Patch Cord**

The tower mount frame provides a modular, high density, cross-connect and cable management system. The base tower is supplied as a 288 pair unit and the capacity can be increased using additional extension frames. Tower units are supplied with wiring bases and connector blocks for 288 pair.

Description	Part Number
110 Tower, 288 pair mounting frame	C6C110TWR288P
110 Tower, 288 pair extension mounting frame	C6C110TWR288PE

Cross-connect patch cords are available in 110 to 110 style or 110 to RJ45 style. The standard Category 6 110 connector is supplied in a 4 pair version only.

Description	110 – 110	110 – RJ45
Cross Connect Patch Cord - 1.0m	C6C110110PC010	C6C1101RJ4PC010
Cross Connect Patch Cord - 1.5m	C6C110110PC015	C6C1101RJ4PC015

Cross Connect Patch Cord - 5.0m	C6C110110PC050	C6C1101RJ4PC050

**Category 6 Cross-Connect Insertion Tool and Wiring Bases and Connector Blocks**

**Handle** - To ensure correct termination of Brand-Rex's Category 6 Cross Connect solution it is advised to use a specially designed handle. The handle is used to simultaneously terminate the 4 pairs onto Category 6 Cross Connect wiring bases and underneath the Category 6 connector block. A Replacement Head is also available when the tool becomes worn.

**Wiring Base** - The Category 6 110 wiring base can be supplied as a 48, 96 or 288 pair version, with or without legs. It can also be supplied rack mounted as a 96, 192 or 288 pair version. Designation labels are included with the bases.

**48 Pair Wiring Base Kits** - A typical kit for a 48 pair wiring base includes a basic wiring base and 12 off 4 pair connector blocks.

**96 Pair Wiring Base Kits** - A typical kit for a rack mounted 96 pair wiring base includes 2 off 48 pair wiring base and 24 off 4 pair connector blocks.

**Connector Block** - The 4 pair connector is specifically designed to exceed Category 6 performance, has a robust design and is colour coded for easy identification. The connector is supplied in bags of 10.

#### BRAND-REX GIGAPLUS SYSTEM (CATEGORY 5E - CLASS D)

##### Key Features

- GigaPlus is a fully standards compliant open system.
- GigaPlus exceeds the requirements of ISO/IEC 11801 and EN 50173-1 for Class D channels and ANSI/TIA/EIA 568C.
- GigaPlus is third party certified by 3P and GHMT.
- GigaPlus provides a secure, cost-effective and flexible Cat5e cabling system solution for running today's LAN protocols and high speed applications such as 1000Base-T.
- Reduced bit error rate as a result of system margins that exceed the standards.
- System available in both shielded and unshielded options.
- GigaPlus is interoperable and backwards compatible.
- GigaPlus can be installed within hostile environments, contact Brand-Rex for recommendations and advice.
- GigaPlus is Power over Ethernet (PoE and PoEP) compatible and supports
  - VoIP
  - Wireless LAN access points
  - Security cameras

GigaPlus Patch Cords

UTP

FTP

GigaPlus patch cords enable you to get the optimum performance from your cabling system. Our factory made and tested patch cords offer you guaranteed quality, and ensure that your system avoids the performance degradation that inferior alternatives will give you at high data rates. All patch cords are supplied with boots and ID tag.

Category 5e Wiring Base

**Wiring Base** - The Category 5e 110-wiring base can be supplied as a 50, 100 or 300 pair version, with or without legs. It can also be supplied rack mounted as a 100, 200 or 300 pair version. Designation labels are included with the bases.

**50 Pair Wiring Base Kits** - A typical kit for a 50 pair wiring base includes a basic wiring base and 12 off 4 pair connector blocks. A typical kit for a rack mounted 100 pair wiring base includes 2 off 50 pair wiring base, 25 off 4 pair connector blocks and 5 off 5 pair connector blocks.

**Connector Block** -The connector can be supplied as a 4 or 5 pair version and is specifically designed to exceed Category 5e performance. It has a robust design and is colour coded for easy identification. The connector is supplied in bags of 10.

#### BRAND-REX VOICE SYSTEM (CATEGORY 3 - CLASS C)

The Brand-Rex Voice System is a comprehensive system of high quality VOICE products forming part of the Brand-Rex range and is therefore backed by a 25 year system warranty for total peace of mind

- Compact 1U 25 and 50 port voice panels that give maximum configurable connections at both front and rear.
- Network termination boxes (30 pair, 50 pair & 100 pair) plus 10 pair disconnection strips.
- Category 3 voice cable for higher performance voice links.
- A full range of accessories providing total installed voice solutions.

### VOICE Connectivity

Brand-Rex VOICE includes a range of surface mounted telecom boxes for multipair cable termination, surface mounted outlets, 50 x 25mm UK styled faceplate modules and line adaptor fly leads.

Description	Part Number
Wall Mount Dist Box - 3 Block (150 x 104 x 55)	MMCWDBU03001
Wall Mount Dist Box - 5 Block (129 x 160 x 90)	MMCWDBU05001
Wall Mount Dist Box - 10 Block (318 x 209 x 122)	MMCWDBU10001
Disconnection Block - 10 Pair	MMCDISU10PK001
10 Pair Disconnect Block Label Holder	MMCLBL10PU001

24 AWG U/UTP MultiPair Sheathed Cable

Brand-Rex VOICE cables consist of 0.51mm Polyolefin insulated conductors formed into one or more units of twisted pairs. The units are identified with coloured binders and are assembled to form the cable core. The core may be protected with one or more layers of dielectric material and is covered by a protective LSHP sheath.

Unshielded Panels

The 19" rack mounted patch panel is available in 25 and 50 port versions, both have a slimline 1U footprint suitable for compact installations maximising rack space. These panels are supplied with cable ties, earth lead, cable manager, mounting bolts and short form instructions. The rear of the panel offers a choice of between 60 and 150 voice pairs to suit a variety of PBX (Private Branch eXchange) systems and direct line connections. This offers maximum flexibility for connection to both future and existing PBX installations.

**BRAND-REX COPPER  
SYSTEMS ACCESSORIES**

- A comprehensive range of structured cabling system accessories to complement any Brand-Rex structured cabling system.

### 48 Port 1U Snap in Jack Patch Panel

The 48 Port 1U Snap-in-Jack Patch Panel is ideally suited for data centre applications and installations where rack space is at a premium. The panel offers exceptional high density with the ability to accommodate up to 48 jacks within a 1U space on a 19" rack. Each panel is screened with port identification strip and also panel identification space to allow for easy port and panel identification. The product has a detachable front fascia, allowing jacks to be removed from the front of the cabinet, and is supplied with an earthing point and a detachable cable manager. Jacks are sold separately.

Description	Part Number
48 Port 1U Snap in Jack Patch Panel	AC6JAKS00DC

#### Compatible System Products

Description	Part Number
10G Shielded Tool Free Jack	AC6JAKS000
Category 6 Shielded Tool Free Jack	C6CJAKS000DC

### Snap-in-Jack Panels

The 19" Modular Panel is a rack mounted Snap-in-Jack panel that has been designed with a double skin to provide flush mounted jacks. The rear of the panel has been plated for grounding to the chassis on shielded systems. All outlets are numerically identified with an additional writable surface for ease of port naming.

Description	24 Port	48 Port 3U
Modular Snap In Jack Panel - Black	MMCPNLX24SIJ2	MMCPNLX48SIJ2
Modular Snap In Jack Panel - Grey	MMCPNLX24SIJ8	MMCPNLX48SIJ8
Modular Panel Cable Manager - Black	MMCACCCMSIJ2	
Modular Panel Cable Manager - Grey	MMCACCCMSIJ8	

Note: Panels supplied empty, Snap-in-Jacks must be purchased separately.

### Snap-in-Jack Angled Panel

The Angled Snap-in-Jack Patch Panel is a 1U 24 Port Panel that facilitates cord routing directly into the rack vertical side management thus rendering horizontal cable managers redundant. The resultant increased rack density not only saves valuable space but also offers a panel that eases bending stresses on the cord while maximising performance. The design accommodates a separate rear cable manager to provide a strain relief feature for the simple routing of horizontal cabling and also allows for colour coded labelling.

Faceplates, Backboxes and Modules

Brand-Rex supplies a comprehensive range of plastic accessories to provide an outlet solution for wall, trunking and floorbox applications. These accessories have been designed to be used in conjunction with Brand-Rex Snap-in-Jacks.

All UK style faceplates are supplied with M3.5 mounting screws and are available in both modular or shuttered versions.

Backboxes can also be supplied to allow for retrofit application where outlets are required to be surface mounted.

Floorbox modules and blanks have been designed to clip into a 1.0 - 2.0mm thick plate with a standard 22 x 37mm floorbox cut-out.

**Snap-in-Jack Modules and Dual Angled Snap-in-Jack Modules**

Single and double Snap-in-Jack Modules have been designed to accept the standard Brand-Rex Snap-in-Jacks and are fully compatible with the 'Legrand Mosaic' and our continental UNI style faceplates. The Dual angled Snap-in-Jack module has been designed to accept two standard Snap-in-Jacks and is fully compatible with the standard 45 x 45mm aperture and our continental UNI style faceplates.

Description	Part Number
1 Way Snap-In Jack Module	MMCUNILGS45001
2 Way Snap-In Jack Module	MMCUNILGD45001
Dual 45 x 45mm Angled Snap-in-Jack module	MMCANGLGD45001

Angled Snap-in-Jack Module 45 x 45mm Double Port	MMCANGLGD45002
Keystone Snap-in-Jack Faceplate Module	MMCANGDK2453

**Single Port DIN Rail Snap-in-Jack Module**

The DIN Rail Snap-in-Jack Module offers a connection point in the cabling subsystem and is suitable for deployment in residential, industrial and enterprise structured cabling systems. The module is designed to be easily snapped onto a DIN rail and it offers unrivalled usability and accessibility. Multiple modules can be aligned horizontally in a row and the angled direction of the jacks facilitates cord routing in a way that eases bending stresses while maximising performance.

Description	Part Number
Single Port DIN Rail Snap-in-Jack Module	MMCDINSJ58

**Cable Organisers and Termination Tools**

Within the standard Brand-Rex product range is a set of standard tools for the safe and efficient termination of copper cables. These tools are available for both LSA and 110 style IDC connectors.

Also available is a Brand-Rex Jack Gripper to hold Snap-in-Jacks during termination and the range of Snap-in-Jack blanks.

The cable management range complements the set of Cross-Connect components offered by Brand-Rex. The horizontal cable organisers can be supplied with or without legs and also as a 19" rack mounted version.

**Compatible System Products**

Description	Part Number
Horizontal Cable Organiser with Legs	CMH110L
Horizontal Cable Organiser without Legs	CMH110
Horizontal Cable Organiser Rack Mounted	CMH110R
Vertical Cable Organiser for 110 Tower	CMV110TWR

Punchdown Tool Blade - LSA	MMCACCLSA
Jack Gripper	MMCJH002
Snap-in-Jack Blank	MMCJAKBLK2
Snap-in-Jack Blank	MMCJAKBLK3

Brand-Rex is to the continued development of high quality optical cabling solutions for the future requirements of both LAN and WAN networks. Optical system benefits include:

- **Transmission Security** – As optical fibre emits no electromagnetic energy there is no opportunity to intercept transmissions remotely.
- **Bandwidth** – Optical fibre has a much greater data capacity than copper, carrying more data further.
- **Transmission Distance** – Optical systems have much lower attenuation than copper systems meaning that signals can be transmitted further.
- **No Risk of EMI or RFI** – Fibre optic cables being primarily glass have no risk of electromagnetic or radio frequency interference.

#### **Why Brand-Rex**

Brand-Rex offers a complete panel to panel solution, utilising all standard connectors and cable formats to deliver a high quality reliable optical solution for your LAN. The Brand-Rex solution includes a full range of HFFR-LS (halogen free flame retardant low smoke) tight buffered and loose tube cables, a comprehensive range of connectors, adaptors, pigtailed and patch cords. The range also includes all the features that you would expect from a Brand-Rex system component.

The complete LAN solution is covered by the 25 year Brand-Rex channel warranty only available from authorised Brand-Rex installation partners.

## CABLE SELECTION:

When selecting the correct cable for any installation the first question will be of fibre type. This is dependent upon the transmission distance and the protocol being adopted. Further on in this section is a key to transmission distances on the main fibre types for 1Gb and 10 Gb Ethernet applications.

With the choice of fibre type complete, the selection of cable construction must be made. There are several key questions that must be answered in determining cable selection.

### Fibre Count -

#### How many fibres are required?

This should take into account future demand and allow an element of redundancy. The cost of installation and associated down time will generally outweigh the cost of additional fibre on day one.

Additionally, good practice should be taken into consideration. A large, high fibre count cable carrying the majority of a company's data generates a larger risk than several lower fibre count cables, should any cable damage occur. Diversity in routing should also be considered in answering this question.

### Cable Properties –

#### What type of cable is required?

The prime function of the cable is to provide a safe path for the fibre during and post installation. There are a wide variety of cable types to choose from depending on how and where the cable is to be installed.

A summary of the main construction variants and their intended usage is given below.

## Sheath Options:

### Universal Cables

These cables are designed for use both internally and externally.

They have a Low Smoke Halogen Free (LSHF) compound sheath that reduces the emission of toxic fumes and reduces the spread of fire.

### Outdoor Cables

These cables are designed only for external use. They have a Low Density Polyethylene sheath that makes the cable lighter than the equivalent LSHF version. This combined with reduced weight makes Outdoor Cables more suited for the longer pulled runs into which they are generally installed. Outdoor Cables may enter buildings, however they must not pass more than 3m into the building dependant on local regulations.

## Cable Options:

### Premise Distribution (PDC) Cables

These cables are based on a 900 µm tight buffered element and are generally installed in the backbone of a building network and direct terminated at a consolidation point. Brand-Rex PDC cables are manufactured in our state of the art UK based factory and consist of up to 24 individual tight buffered elements and distributed strength members. The product is then sheathed with a LSHF compound making it suitable for internal and external applications.

### Breakout and Patch Cables

To produce the building block for breakout cables, a 900 µm tight buffered element is sheathed with an additional layer of LSHF compound over a layer of aramid yarns. This forms a simplex sub unit that can be used in the production of optical patch cords or used for fibre to the desk (FTTD) applications; additionally it forms the base unit for the breakout cables.

## Loose Tube Cables

Loose tube cables provide for higher fibre counts than are commonly available in tight buffered element based products such as PDC and breakout cables. They can generally be installed as building or campus links and are available in a variety of constructions offering different mechanical performance.

The building block of a loose tube cable is a PBT tube that contains up to 24 individually coloured optical fibres suspended in a gel material to provide protection and prevent water ingress. These gel filled loose tubes are used to produce either Unitube or Multi Loose Tube cables.

Brand-Rex loose tube cables are manufactured in our UK based optical facility and are available in 4 standard variants;

1. Duct Grade
2. Rodent Resistant Glass Armoured
3. Direct Burial Grade – Single Sheath
4. Direct Burial Grade – Twin Sheath

All 4 variants are available as either Unitube or Multi Loose tube cable. Unitube products are available with up to 24 fibres and Multi Loose Tube products are available with up to 216 fibres as standard, although higher fibre counts are available on request.

The Unitube products take a single gel filled loose tube and apply the relevant armouring and then either a Universal LSHF sheath or a Polyethylene outdoor sheath. The Multi Loose Tube products take up to 18 gel filled loose tubes around a glass central strength member before adding the relevant armouring and either a Universal LSHF sheath or a Polyethylene outdoor sheath.

The tables below describe the standard fibres supplied by Brand-Rex that comply with or exceed ISO/IEC 11801 and EN50173-1 and EN50173-2 requirements, for use in high speed LAN, MAN, WAN data and telecom networks. Specific Fibre Types to customer specification are available on request.

## DISTRIBUTION CABLES

FibrePlus distribution cables are based around standard 900 µm tight buffered element which offers excellent environmental performance.

The standard range of distribution cables is available with up to 24 fibres and the cables are designed for use in building backbone applications. Cable can be installed in cable conduits by pulling or alternatively can be laid in roof / floor voids.

The FibrePlus distribution cable range has a Low Smoke Halogen Free sheath and mechanical strength is derived from strength members surrounding the multiple tight buffered cores.

### Breakout and patch cord cables

FibrePlus breakout cables are based on standard 2.80mm single fibre cable sub units and are designed for use in building backbone applications or for cross connections in equipment rooms with suitable terminations. The cables are designed to be pulled into conduits or alternatively can be placed in floor / roof void cable trays.

The single fibre cable sub unit consists of a 900 µm tight buffered fibre surrounded with aramid yarns and a Low Smoke Halogen Free sheath. The breakout cable takes these sub unit, and adds additional aramid strength members plus an outer Low Smoke Halogen Free sheath to give a metal-free robust and flexible breakout cable.

### Tight Buffered Premise Distribution Cables

For building backbone and horizontal distribution applications, the PDC cable range has been designed to be compact and yet offer excellent tensile performance making it suitable for a wide range of applications. All PDC cables are constructed around the 900µm tight buffered elements which are suitable for direct termination.

### Ruggedised Fibre Patch Cable

Ruggedised tight buffered patching cable is used in the manufacture of patch cords. The robust construction is designed for short run indoor patching or where frequent handling is likely such as in equipment rooms, wiring closets and at user outlets. The cable is readily retained by industry standard connectors and can easily be made into a patch cord. The cable is colour coded for ease of identification during and post installation and comes in both single fibre (SFC) and duplex fibre (ZIP) constructions.

## LOOSE TUBE CABLES

FibrePlus loose tube cables are available in unitube or multi loose tube constructions.

Multi loose tube cables are available as standard in 6 x 4 fibre per tube, 6 x 12 fibre per tube, 5 x 12 fibre per tube, 8 x 12 fibre per tube, 12 x 12 fibre per tube and 18 x 12 fibre per tubes options, offering up to 216 fibres. The three standard variants are a general duct grade cable; a glass yarn armoured cable and a corrugated steel tape armoured direct burial cable.

Loose tube cables are designed for use in building or campus backbone applications and can be installed by blowing, winching or pulling into existing sub ducts or cable conduits. Steel tape armoured products can also be direct buried.

Bespoke loose tube cables to client specifications with additional features or modified mechanical performance are available on request subject to MOQ and lead-time.

### Mini Unitube Cable

For short run backbone applications, the Mini Unitube cable range has been designed to be lightweight, flexible, compact and completed with a white sheath to be discrete in the home. The 2 and 4 fibre variants are constructed with a 1.9mm gel filled loose tube, layer of glass yarns and a Low Smoke Halogen Free (LSHF) outer sheath.

### UDU and UDE Duct Grade Unitube Cables

For building backbone applications, the duct grade unitube cable range has been designed to be lightweight and compact. The 4-12 fibre product variants are constructed around a 2.90mm gel filled loose tube, whereas the 16-24 fibre variants use a 4.00mm loose tube.

**URU and URE**  
Glass Yarn Armoured Unitube Cable

For applications where protection from rodent attack is required, this product range offers level 2 rodent protection in the form of glass roving armour which deters rodents from chewing on optical cables. The 4-12 fibre product variants are constructed around a 2.90mm gel filled loose tube, whereas the 16-24 fibre variants use a 4.00mm loose tube.

**USU and USE**  
Steel Tape Armoured Unitube Cables

For direct burial campus backbone applications, the steel tape armoured unitube cable range has been designed to be compact and yet offer excellent tensile and crush performance making it suitable for a wide range of applications. All USU and USE steel tape armoured unitube cables are constructed around the 4.00mm gel filled PBT loose buffer tube. The 16-24 fibre variants are supplied with 2 bundles within the loose tube.

**Universal MDU 01 and External MDE 01**  
Duct Grade Multi Loose Tube Cable

For applications where a higher tensile load is required versus that offered by unitube constructions, the universal product range offers compact low fibre count duct grade cable. The product range consists of up to 6 x 2.1mm diameter loose tubes containing up to 4 fibres and solid fillers where required, stranded around a rigid glass non metallic central strength member. A layer of water blocking tape provides interstitial water blocking.

**Universal MRU 01 and External MRE 01**  
Glass Yarn Armoured Rodent Resistant Multi Loose Tube Cable

For applications where protection from rodent attack is required and a higher tensile load is required, the universal MRR product range offers rodent protection in the form of glass roving armour which deters rodents from chewing on optical cables. The product range consists up to 6 x 2.10mm loose tubes containing up to 4 fibres and solid fillers where required, stranded around a rigid glass non metallic central strength member. A layer of water blocking tape provides interstitial water blocking.

**Universal MSU 01 and External MSE 01**  
Direct Burial Steel Tape Armoured Multi Loose Tube Cable

For applications where a higher tensile load is required versus that offered by unitube constructions, this product range offers a compact low fibre count direct burial grade cable. The product range consists of up to 6 x 2.10mm loose tubes containing up to 4 fibres and solid fillers where required, stranded around a rigid glass non metallic central strength member. A layer of water blocking tape provides interstitial water blocking and a layer of corrugated steel tape armour provides additional crush resistance.

Brand-Rex is pleased to offer a FibrePlus cable for specialist applications. The UFS Fire Survival cable is used in areas where critical data transmission must continue when the building structure in which it is installed is on fire. For this reason its use in large public buildings such as datacentres, airports, railway stations, stadia and onshore/offshore industrial structures is becoming increasingly common.

The use of the cable in building management, fire and security systems means that these vital systems will remain functional in the event of a real life incident which requires an emergency evacuation.

As a company that is driven by our customers needs, Brand-Rex will always be happy to offer specialist products to order based on your own specification.

This includes complex requirements ranging from cables for extreme environments to simple requirements such as composite cables, custom sheath colours or printing. Please enquire about our customised cable service.

### Universal UFS 01 Unitube Fire Survival Cable

In today's business environment the secure backup of business critical systems in the event of an emergency is a pre-requisite. The UFS 01 Fire Survival cable is used in areas where critical data transmission must continue when the building or structure in which it is installed is on fire. For this reason its use in large public buildings such as datacentres, airports, railway stations, stadia and onshore/offshore industrial structures is becoming increasingly common. The use of the cable in building management, fire and security systems means that these vital systems will remain functional in the event of a real life incident which requires an emergency evacuation.

FibrePlus is a comprehensive range of premium products including Single Mode and Multi Mode Pigtails and Patch Cords using ST, SC, FC and LC Connectors and Adaptors.

All connectorised assembly types are available as either Multi Mode; to connect OM1, OM2, OM3 and OM4 cables and Single Mode to connect OS1 and OS2 cables. All are manufactured to comply with the international standards ISO/IEC 11801, EN50173-1 and ANSI/TIA/ETA 568C.

For rack management the FibrePlus Optical Patch Panel, Cable Management Plates and Modules offer a flexible, cost effective solution with the ability to cater for growth.

Available as an empty panel, suitable for all mainstream connector types the product is able to manage up to 96 Fibres in 1U using Small Form Factor connectors.

The sliding shelf design, along with other added features, enables quick and easy reconfiguration and expansion making future upgrades and changes both quicker and easier. Full Blolite support is part of the flexible future proofing designed into this product.

Pre-Connectorised Cable Assemblies, Wall outlets, complete the range providing end to end, in-building and campus cabling solutions.

## 62.5/125 OM1 Multi Mode Optical Patch Cords

For use in permanent connections between transmission equipment and patch panels or interconnect / cross connect between panels. Patch cords are pre-constructed with connectors. These include small form factors such as LC and MT-RJ as well as SC, FC and ST. Based on 2.80mm sub units (1.9mm SFF) these cables are sheathed with LSHF material making them suitable for internal use.

Single Mode and Multi Mode Optical Pigtaills

For use in permanent connections between patch panels and incoming cables / single blown fibres. Pigtaills are pre-constructed with connectors. Connector options include small form factors such as LC as well as SC, FC and ST. Based on 900µm tight buffered cores (600µm SFF) and suitable for internal use only inside suitable Fibre Management Systems.

**FibrePlus - Unloaded Panels & Panel Options**

The FibrePlus 1U fibre 19" Optic Patch Panels have been designed to optimise both the internal fibre management but also to add greater fibre density. Constructed from mild steel with a powder coated paint finish the panels are available in Black or Grey. The Patch Panels offers a flexible and highly versatile solution for optical splicing and patching. The panel's shallow depth allows it to be installed within the majority of standard racks and wall mounted enclosures. The integrated design features ensure that even once installed panels can be readily re-configured to accommodate the changing needs of today's high speed networks.

Description	Part Number
Unloaded Optical for up to 24 ST or FC adaptors - Black	FPCC1SXXX24ST2
Unloaded Optical for up to 12 SC Duplex or LC Quad adaptors - Black	FPCC1SXXX24DC2
Unloaded Optical for up to 24 SC Duplex or LC Quad adaptors - Black	FPCC1SXXX48DC2
Unloaded Optical for up to 24 SC Simplex, MT-RJ & LC Duplex adaptors - Black	FPCC1SXXX48SC2
Fibre management kit including loops and 24 way splice bridge	FPFCFMKIT001
Adaptor collar for 3mm Straight connector	30-0301-5
ST/FC Blanking Plugs (Black) - Pack 100	BPST101-100
SC Simplex Blanking Plug (also suitable for LC & MT -RJ) (Black) - Pack 100	BPESC101-100
SC Duplex Blanking Plug (also suitable for LC Quad) (Black) - Pack 100	BPESC301-100
25mm Manifold Gland	30-4800-09

**FibrePlus - Part Loaded Patch Panels**

The FibrePlus 19" 1U fibre Optic Patch Panels have been designed to optimise both the internal fibre management but also to add greater fibre density. Constructed from mild steel with a powder coated paint finish the panels are available in Black or Grey. The Patch Panels offers a flexible and highly versatile solution for optical splicing and patching. The panel's shallow depth allows it to be installed within the majority of standard racks and wall mounted enclosures. The integrated design features ensure that even once installed panels can be readily re-configured to accommodate the changing needs of today's high speed networks.

### High Density Fibre Management Panel

The High Density Fibre Management Panel offers the ultimate solution for management of fibre in Data Centres and telecoms rooms. The panel combines a robust metal frame with precision injection moulded plastic to deliver a flexible and secure construction while still offering fully integrated and flexible fibre management. The 1U 48 LC port patch panel facilitates patch cord routing directly into the rack vertical side management, thus increasing rack density and easing undue stresses on the cords. It is designed to pivot and hinge providing the control and security of a fixed panel but also allowing for increased access and usability.

Description	Part Number
High Density Fibre Management Panel, 48 LC Ports, 1U Dual cassette, part loaded with 12 x Quad LC Multi-mode adaptors & glands - Black	FPCPC1XMM48LC2
High Density Fibre Management Panel, 48 LC Ports, 1U Dual cassette, part loaded with 12 x Quad LC Single-mode adaptors & glands - Black	FPCPC1XSM48LC2

### FibrePlus Dual Pivoting Patch Panel

The 48 fibre universal dual pivoting patch panel provides easy segregation of fibres, perfect for separating services. The unique design offers features, such as the swivel function in a universal 19" size, normally only found in bespoke solutions. It is simple to manage and offers easy access in the event of moves, adds or changes.

The dual cassette design pivots from the left and right allowing the patch cords to exit the panel from the two sides giving fast access to the fibre management whilst maintaining a fixed cable entry point. Easy to install lightweight and robust construction, the transparent cover protects the fibre and allows quick and easy access.

Description	Part Number
19" Optical Dual Pivoting Panel (1U)- populated with Single-Mode flangeless LC Quad adaptors	TCCPC1SM48LC2
19" Optical Dual Pivoting Panel (1U)- populated with Multi-Mode flangeless LC Quad adaptors	TCCPC1MM48LC2
19" Optical Dual Pivoting Panel (1U) – unpopulated	TCCPC1XXXXX2

### 45mm x 45mm and 50mm x 50mm Faceplate Modules

FPCANGL4MM3UK

FPCANGDCMM3UK

The Brand-Rex range of 45 x 45 Fibre faceplate modules is designed for use in installation poles, wall trunking and back boxes. Configurations are available for Euro style 45 x 45mm faceplates and UK style 50 x 50mm versions offering a versatile solution.

Description	Part Number
45w x 45 mm Fibre Faceplate Module LC Duplex Multi Mode	FPCANGLCMM3
45 x 45 mm Fibre Faceplate Module LC Duplex Single Mode	FPCANGLCSM3
45 x 45 mm Fibre Faceplate Module LC Quad Multi Mode	FPCANGL4MM3

44mm Deep Back Box	MMCSGBB44001

Brand-Rex product datasheets contain detailed information on each product's physical characteristics, electrical parameters and performance data. The most up to date datasheets can be found at [www.brand-rex.com/datasheet](http://www.brand-rex.com/datasheet)

**SC Optical Connectors**

**SC Simplex and Duplex Connectors**

SC multimode and single mode connector kits comprise of a one piece SC body with precision ceramic ferrule, crimp, sleeve, colour coded outer shroud, 2 x colour coded 3mm strain relief boots and a 0.9mm boot. SC Duplex connector kits comprise of 2 simplex connectors mounted in a two piece polymer clip and 2 x colour coded 3mm strain relief boots.

**SC Simplex Adaptor**

SC Adaptors comprise of a polymer outer body and inner assembly fitted with a precision alignment sleeve. Multimode with metal sleeve. Single mode with ceramic sleeve.

**SC Duplex Adaptor**

SC Duplex adaptors comprise of a polymer outer body and an inner assembly fitted with a precision alignment sleeve. Multimode with metal sleeve. Single mode with ceramic sleeve.

Description	Connector	Adaptor
SC - MultiMode (Beige)	FOCSCEPMM001	BHCSCMM001
SC - Single Mode (Blue)	FOCSCEPSM001	BHCSCSM001
SC Duplex - Multi Mode (Beige)	FOCDCEPMM001	BHDCM001
SC Duplex - Single Mode (Blue)	FOCDCEPSM001	BHDCSM001

**ST, FC Optical Connectors**

**ST Connector**

ST connector kits comprise of a nickel plated zinc coupling body with a precision ceramic ferrule, crimp sleeve, 2 x colour coded 3mm strain reliefs and a 0.9mm boot.

**ST Adaptor**

ST adaptors comprise of a nickel plated zinc die cast body with a precision alignment sleeve. They are both standard and double 'D' hole compatible. Multimode with metal sleeve. Single mode with ceramic sleeve.

**FC Adaptor**

FC adaptors comprise of a nickel plated brass body that is fitted with a precision alignment sleeve. They are standard single and double 'D' hole compatible.

Description	Connector	Adaptor
ST - Multi Mode	FOCSTEPMM001	BHCSTMM001
ST Single Mode	FOCSTEP5M001	BHCSTSM001
FC-PC Single Mode	FOCFCEPSM001	BHCFCSM001

## LC Optical Connectors

The range of Brand-Rex SFF (Small Form Factor) connectivity solutions are reliable and robust, quality products. SFF connectors are duplex fibre connectors which have a footprint similar to RJ-45's, offering the system integrator / installer an improved patching density, saving valuable rack space. The products can be used at the panel or in the work area supporting both backbone fibre and fibre to the desk solutions. Brand-Rex offers a choice of leading, de-facto, SFF connectors, the MT-RJ and the LC.

### LC Connector:

LC multimode and single mode connector kits comprise of a precision ferrule, crimp sleeve, colour coded outer shroud, 2 x colour coded 2.0mm strain reliefs (..001) or a 0.9mm (..002) boot.

### LC Duplex Adaptor:

LC adaptors (BHCLCX001) comprise of a polymer body with a precision alignment sleeve. They have the outer dimensions of a simplex SC style adaptor.

### LC Quad Adaptor:

LC adaptors (BHCL4XM001) comprise of a polymer body with precision alignment sleeves. They have the outer dimensions of a duplex SC style adaptor.

Description	Connector	Adaptor
LC Multimode (Duplex) (Beige)	FOCLCEPMM001	BHCLCMM001
LC Single Mode (Duplex) (Blue)	FOCLCEPSM001	BHCLCSM001
LC Multimode (Simplex) (Beige)	FOCLSEPM001	-
LC Single Mode (Simplex) (Blue)	FOCLSEPSM001	-
LC Multimode (Simplex Pigtail) (Beige)	FOCLSEPM002	-
LC Single Mode (Simplex Pigtail) (Blue)	FOCLSEPSM002	-
LC Multimode (Quad) Beige	-	BHCL4MM001
LC Single Mode (Quad) (Blue)	-	BHCL4SM001
MT RJ adaptor	-	BHCMJXX001

**Secure LC Patch Cord System**

The Secure Lock system comprises of a secure patch cord, blank adaptor plug and extraction tool. The Secure LC patch cord prevents unauthorised port access or changes as it can only be removed using a unique keyed extraction tool, making it ideal for creating a secure area within Data centres and IT networks. The Duplex LC patch cords will plug into any industry compliant Duplex and Quad adaptors or active interfaces. The locking plug closes off ports, restricting access and offering dust protection. When fitted, the plug can only be removed with the correct tool. The keyed extraction tool unlocks and releases the connectors from ports. Keys are available for custom applications and can be customised to only release the same coloured LC connector or blank adaptor plug.

Description	Length	Part Number*

**KeyQuick® Mechanical Splice**

KeyQuick® Mechanical Splice is an innovative, quick and easy to use mechanical splice. The full field termination solution includes mechanical splice and splice holders as well as universal connectors and is designed to offer installers a fast, accurate and user friendly splicing process.

Description	Part Number
KeyQuick® Mechanical Splice 250µm, 900µm	FPCM5001
KeyQuick® Mechanical Splice Holder	FPCM5H06

Before connection

After connection

Splice Holder

**KeyQuick® KQ10 Field Installable Connectors**

KeyQuick® Field Installable KQ10 Connectors offer an innovative solution for onsite connector terminations. The SC connectors are ideal for backbone, horizontal and FTTH applications, offering an easy, fast, accurate and user friendly connector splicing process.

Description	Part Number
KeyQuick® SC APC Single Mode Connector - Universal G652D	FOCACFT008001
KeyQuick® SC UPC Single Mode Connector - Universal G652D	FOCUCFT008001
KeyQuick® SC UPC Multimode Connector - Universal 62.5/125	FOCUCFT062001
KeyQuick® SC UPC Multimode Connector - Universal 50/125 OM3	FOCUCFTOM3001
KeyQuick® SC UPC Multimode Connector - Universal 50/125 OM4	FOCUCFTOM4001

Before connection

After connection

Customer requirements in the ever-advancing communications market continues to grow, stretching scarce bandwidth resources and truly testing the performance of today's networks.

In choosing cabling system solutions, whether for small, medium or large multi site locations, server farms or co-location datacentres, network planners have some serious issues to consider. Among these is the decision as to which type and mix of fibre to install to allow for network expansion and upgrades which has been a dilemma for many years.

In the past, industry practice has been to install 'dark fibre' to meet future demands, however, this strategy is by no means risk-free as unterminated, untested fibres may not be fit for purpose when the time comes to light the fibres in the future. Fortunately there is a simple and cost effective solution - Brand-Rex Air Blown Fibre Systems offer solutions for both Internal and External applications with their market leading Blolite and MicroBlo. The use of Air Blown Fibre Systems gives complete freedom from risk by pre-installing a ducting route and then blowing in the fibre element (and paying for it) only when required.

The Blolite system was one of the first Air Blown Fibre systems, it is also regarded as the 'industry standard' Air Blown Fibre System. The Blolite system is very versatile with backbone and / or fibre to the desk links and can even allow for long distance links of up to 1km. Blolite is easily installed, by using compressed air, there is no disruption to the workplace, Blolite fibres are simply terminated and are compatible with all standard optical connectors.

Blolite is also extremely reliable, with a zero failure rate since the first installations in 1988 - truly an 'insurance policy' for high speed networks. It is no surprise that major users such as Manchester Airport, IBM, Ericsson, GlaxoSmithKline (GSK), the British MoD, Aerospatiale, Pfizer and even the US Navy have taken advantage of the system.

**Blolite Single Blown Fibre Elements**

The Blolite system offers a complete range of high quality single mode and multimode optical fibres, with a blowable coating and fibre, is strippable with standard tools and is compatible with standard connector types. Blolite fibre is available in twelve standard colours and is supplied on plastic spools in 2km or 4km lengths for installation into Blolite 3mm, 5mm and 8mm MicroDuct by trained and licensed Blolite installers using the IM2000 blow head.

**Blolite Internal MultiDucts**

To facilitate the installation of Blolite single blown fibres a range of multi-way MicroDucts into which Blolite fibres can be blown are available. The internal range of these MicroDucts are constructed with the standard Blolite MicroDuct surrounded with a layer of polyester tape and a LSHF outer sheath making them suitable for internal applications.

**Microduct size = 3/2.1mm**

Description	Diameter (mm)	Part Number
1w 3/2.1mm (PO)-I	5.0	BL01IN0321

**Blolite Direct Intall MultiDucts**

To facilitate the installation of Blolite single blown fibres a range of multi-way MicroDucts into which Blolite fibres can be blown are available. The external range of these MultiDucts are constructed with the standard Blolite MicroDuct surrounded with a layer of Polyester tape and a Polyethylene outer sheath making them suitable for direct install applications.

**Microduct size = 5/3.5mm**

Description	Diameter (mm)	Part Number
1w 5/3.5mm (LSHF)-O	7.5	BL01DI0535

**2-12 Fibre Blown Micro Cable**

Microduct cabling systems are popular solutions for building flexibility into a network, they can be populated when needed and leave spare capacity for future growth. The ability to defer initial installation costs is a key advantage of an air blown cable installation over traditional cable installations. The MicroBlo air blown loose tube microduct cable is available with fibre counts from 2 to 12 in a 2.5 mm diameter package. The cable has been specifically designed and developed for improved installation efficiency in pre-installed 5/3.5 mm microducts using existing air blown installation techniques.

**12-72 Fibre Blown Micro Cable**

Microduct cabling systems are popular solutions for building flexibility into a network, they can be populated when needed and leave spare capacity for future growth. The ability to defer initial installation costs is a key advantage of an air blown cable installation over traditional cable installations.

The MicroBlo air blown loose tube microduct cable is available with fibre counts from 12 to 72 in a 6.0 mm diameter package. The micro cable is constructed of a non metallic, resin bonded glass central strength member and high density polyethylene sheath. The cable has been specifically designed and developed for improved installation efficiency in pre-installed 10/8 mm microducts using existing air blown installation techniques. Dry water blocking technology ensures the cable cores are fully water blocked.

## Up to 96 Fibre Micro Cable

Microduct cabling systems are popular solutions for building flexibility into a network, they can be populated when needed and leave spare capacity for future growth. The ability to defer initial installation costs is a key advantage of an air blown cable installation over traditional cable installations. The MicroBlo air blown loose tube microduct cable is available with fibre counts of 84 and 96 fibres in a 7.0mm diameter package. The cable has been specifically designed and developed for improved installation efficiency in pre-installed 12 /9.4 mm microducts using existing air blown installation techniques. Dry water blocking technology ensures the cable cores are fully water blocked.

## MicroBlo Direct Install Protected MicroDucts

Microduct cabling systems are popular solutions for building flexibility into a network, they can be populated when needed and leave spare capacity for future growth. The ability to defer initial installation costs is a key advantage of an air blown cable installation over traditional cable installations.

To facilitate the installation of MicroBlo Microcables, a range of Protected Microducts (multiways) into which Microcables can be blown are available. The Direct Install range of Protected Microducts are constructed with standard individual microducts with a PE sheathing for installation into existing duct and sub-ducting infrastructure.

### Microduct size = 5/3.5mm Outer diameter/Bore

Description	Diameter (mm)	Part Number
1W 5/3.5mm	5	MB01DI0535
2W 5/3.5mm	11.5	MB02DI0535
4W 5/3.5mm	13.6	MB04DI0535
7W 5/3.5mm	16.5	MB07DI0535
12W 5/3.5mm	21.5	MB12DI0535
19W 5/3.5mm	26.5	MB19DI0535

### Microduct size = 10/8mm Outer diameter/Bore

Description	Diameter (mm)	Part Number
1W 10/8mm	10	MB01DI1008
2W 10/8mm	21.5	MB02DI1008
4W 10/8mm	25.6	MB04DI1008
7W 10/8mm	31.5	MB07DI1008
12W 10/8mm	41.5	MB12DI1008

### Microduct size = 12/10mm Outer diameter/Bore

Description	Diameter (mm)	Part Number
1W 12/10mm	12	MB01DI1210
2W 12/10mm	25.5	MB02DI1210
4W 12/10mm	30	MB04DI1210
7W 12/10mm	37.5	MB07DI1210

## MicroBlo Direct Burial Protected MicroDucts

Microduct cabling systems are popular solutions for building flexibility into a network, they can be populated when needed and leave spare capacity for future growth. The ability to defer initial installation costs is a key advantage of an air blown cable installation over traditional cable installations.

To facilitate the installation of MicroBlo Microcables, a range of Protected Microducts (multiways) into which Microcables can be blown are available. The Direct Burial range of Protected Microducts are constructed with thick wall, direct burial individual microducts with an overall HDPE sheathing making them suitable for direct burial applications.

### Microduct size = 7/3.5mm Outer diameter/Bore

Description	Diameter (mm)	Part Number
1W 7/3.5mm	7	MB01DB0735
2W 7/3.5mm	15.5	MB02DB0735
4W 7/3.5mm	18.4	MB04DB0735
7W 7/3.5mm	22.5	MB07DB0735
12W 7/3.5mm	29.5	MB12DB0735
19W 7/3.5mm	36.5	MB19DB0735
24W 7/3.5mm +1W 14/10mm	43	MB24DB0735

### Microduct size = 12/8mm Outer diameter/Bore

Description	Diameter (mm)	Part Number
1W 12/8mm	12	MB01DB1208
2W 12/8mm	25.5	MB02DB1208
4W 12/8mm	30	MB04DB1208
7W 12/8mm	37.5	MB07DB1208

### Microduct size = 14/10mm Outer diameter/Bore

Description	Diameter (mm)	Part Number
1W 14/10mm	14	MB01DB1410
2W 14/10mm	29.5	MB02DB1410
4W 14/10mm	35	MB04DB1410
7W 14/10mm	43.5	MB07DB1410

## MicroBlo Indoor Protected MicroDucts

Microduct cabling systems are popular solutions for building flexibility into a network, they can be populated when needed and leave spare capacity for future growth. The ability to defer initial installation costs is a key advantage of an air blown cable installation over traditional cable installations.

To facilitate the installation of Microblo Microcables, a range of Protected Microducts (multiways) into which Microcables can be blown are available. The Indoor range of Protected Microducts are constructed with Low Smoke Halogen Free microduct which are sheathed with an overall LSHF protective layer. This product is ideal for providing access into a building and can be simply joined to a DI or DB Microduct to allow the cable to be blown straight from outside into the building.

### Microduct size = 5/3.5mm Outer diameter/Bore

Description	Diameter (mm)	Part Number
1W 5/3.5mm	5	MB01IN0535
2W 5/3.5mm	11.5	MB02IN0535
4W 5/3.5mm	13.6	MB04IN0535
7W 5/3.5mm	16.5	MB07IN0535
12W 5/3.5mm	21.5	MB12IN0535
19W 5/3.5mm	26.5	MB19IN0535

### Microduct size = 10/8mm Outer diameter/Bore

Description	Diameter (mm)	Part Number
1W 10/8mm	10	MB01IN1008
2W 10/8mm	21.5	MB02IN1008
4W 10/8mm	25.6	MB04IN1008
7W 10/8mm	31.5	MB07IN1008
12W 10/8mm	41.5	MB12IN1008

### Microduct size = 12/10mm Outer diameter/Bore

Description	Diameter (mm)	Part Number
1W 12/10mm	12	MB01IN1210
2W 12/10mm	25.5	MB02IN1210
4W 12/10mm	30	MB04IN1210
7W 12/10mm	37.5	MB07IN1210

## Blolite and MicroBlo Microduct Connectivity

Within MicroBlo and Blolite a range of plastic bodied pneumatic tube connectors are used for tube routing. The connectors have a variety of forms and are all rated for the maximum working pressure of 10 Bar. The connectors are installed with a simple push-pull technique and can be re-used several times.

For Part numbers see next page.

**Straight Connector (push-pull mechanism)**  
For connecting 2 equal size microducts.

**Straight Screw Connector (Screw mechanism)**  
For connecting 2 equal size microducts and eliminating movement at joint.

**End Stop**  
For blocking of the end of a redundant tube or temporary sealing.

**3mm Straight Connector**  
For connecting 2 equal size microducts.

**End Plug**  
For blocking a straight connector when a later connection is required.

**Bulkhead Connector**  
For attaching a microduct to a panel or wall box.

**Dust Cap**  
For preventing the ingress of dust during installation.

**Gas Blocking 'T'**  
For use with resin to provide a gas blocking seal where required.

**8mm - 5mm Reducer**  
To reduce from 8mm - 5mm MicroDuct at termination point.

**Termination Splitter / Stem Converter**  
For use at the end of a duct route to divert fibres into different termination points.

**HIGH DENSITY – DESIGN EXCELLENCE**

HI-DEX is an ultra high performance, pre-terminated, modular, Optical Fibre cabling system based on MT ferrule connector technology.

This product set is ideally suited for installation in the data centre where multiple, point to point, fibre connections between distribution racks and equipment racks can be quickly and efficiently installed and where an upgrade path to multi lane higher speed transmissions is required.

This extensive suite of products provides future proofing for multi-gigabit fibre channel infiniband and Ethernet technologies.

**HI-DEX benefits:**

- Unrivaled Accessibility
- Superior Performance
- Maximised Density
- Super Fast Deployment
- Future Proofed Technology

HI-DEX is assembled with standards compliant component products which are designed and manufactured to conform to the requirements of the structured wiring cabling and data centre standards:

- ISO/IEC 11801:2002 & amendments 1 & 2
- EN 50173-1, TIA 568C series cabling standards
- Data Centre IEC 24764, EN 50173-5 and TIA 942

The use of premium grade fibre, low loss LC and low loss MTP® elite connectors allows the designer the flexibility to configure multi-connector links and travel longer distances while still maintaining the challenging optical budget for higher speed Ethernet applications.

### Panel Set

The HI-DEX panel set is based around a 19" 1U panel which can accommodate up to six interchangeable cassettes. The cassettes are mounted on sliding runners which allow each cassette to be brought forward independently of the others, providing unrestricted access to every port. The subdivision of the cassettes facilitates the routing of patchcords to both sides of the panel in order to simplify the management of the patchcords. The addition of a bridge piece ties each row together to provide single-sided routing where required. The front door protects the patches when not in use and provides generous labelling space on both the front and rear faces.

Description	Part Number
HI-DEX 19" 1U Panel in Black	HDXPNL2
HI-DEX 19" 1U Panel in Grey	HDXPNL8
HI-DEX 19" 1U Cable Manager in Black	HDXM1U2
HI-DEX 19" 1U Cable Manager in Grey	HDXM1U8
HI-DEX 1U Finger Management in Black	HDXMNF2
HI-DEX 1U Finger Management in Grey	HDXMNF8

### 24 Fibre Cassettes

HI-DEX closed cassettes provide 24 fibre MTP-to-LC patches per cassette, giving a maximum density of 144 LC fibres in 1U. HI-DEX closed cassettes have two 12-fibre MTP adaptors on the rear and 12 LC duplex adaptors on the front. The LC adaptors feature an integrated shutter which provides both dust and laser protection. The HI-DEX cassette features printed port identification in addition to a supplementary patch labelling area. Innovative B-polarity cassettes provide alpha and beta configurations within a single unit which is flipped to transition between alpha and beta configurations.

Description	Part Number
HI-DEX 2x12 MTP-LC OM4 Cassette in Grey B Polarity	HDXBBTMLCOM424
HI-DEX 2x12 MTP-LC OM3 Cassette in Grey B Polarity	HDXBBTMLCOM324

HI-DEX 2x12 MTP-LC SM Cassette in Grey B Polarity	HDXBBTMLC10824
HI-DEX 2x12 MTP-LC OM4 Cassette in Grey B Polarity	HDXACTMLCOM424
HI-DEX 2x12 MTP-LC OM3 Cassette in Grey B Polarity	HDXACTMLCOM324
HI-DEX 2x12 MTP-LC APC Cassette in Grey B Polarity	HDXACTMAL10824
HI-DEX 2x12 MTP-LC SM Cassette in Grey B Polarity	HDXACTMLC10824

#### Polarity Choices Ordering Information

Product Set	Cable Type	Polarity	MTP Adaptor Type	LC Adaptor Type	Fibre Count
HDX = HI-DEX	AC = A and C Polarity BB = B Polarity	TM = MTP Adaptor with Pins	LC = UPC LC AL = APC LC	OM3 OM4 108	24

Example Part No: HDXBBTMLCOM424 HI-DEX 24-Fibre B-Polarity OM4 MTP® (With Pins) to LC Cassette

### Open Cassettes

HI-DEX open cassettes provide 24 fibre LC presentation or 144 fibre MTP presentation in a single cassette, giving a maximum density of 144 LC fibres or 864 MTP fibres in 1U. Available in single mode and both OM3 and OM4 multimode, HI-DEX open cassettes can be configured with opposed or aligned MTP adaptors or UPC or APC LC adaptors. HI-DEX open cassettes provide an added element of cable management.

Description	Part Number
HI-DEX Opposed Key MTP Open Cassette in Grey	HDXOCAM144
HI-DEX Aligned Key MTP Open Cassette in Grey	HDXOCBM144
HI-DEX Singlemode LC Open Cassette in Grey	HDXOCLC10824
HI-DEX OM3 LC Open Cassette in Grey	HDXOCLCOM324
HI-DEX OM4 LC Open Cassette in Grey	HDXOCLCOM424
HI-DEX Blank Open Cassette in Grey	HDXOCLBK

Brand-Rex product datasheets contain detailed information on each product's physical characteristics, electrical parameters and performance data. The most up to date datasheets can be found at [www.brand-rex.com/datasheet](http://www.brand-rex.com/datasheet)

### Zero U Accessories

The HI-DEX product range includes additional accessory panels which extend the use of HI-DEX beyond traditional U-based racks.

Description	Part Number
HI-DEX Side Rack Consolidation Point in Black (3 cassettes)	HDXZSR2
HI-DEX Cable Tray Consolidation Point in Black (3 cassettes)	HDXZCT2
HI-DEX 3U Hanging Rack Frame in Black	HDXZHR2
HI-DEX 3U Under Floor Frame in Black	HDXZUF2

### MTP to MTP Cable Assemblies

Cable assemblies are made up of 12 fibre LSHF jacketed cables terminated at both ends in MTP Low Loss connectors which can be loomed together to offer increased fibre counts of 24 and 48 fibres. The assemblies can be used as backbone or horizontal cable interconnections between distribution racks and are available in a range of performance levels to suit the needs of the network. Cable assemblies are supplied in standard lengths of 1, 3, 5, 10, 20, 30, 50 and 100m. Custom lengths are also available on request. The assemblies are delivered as coils in lengths up to 50m long and on reels in lengths over 50m. Singlemode cables are yellow; multimode are either aqua (OM3) or heather-violet (OM4).

#### Part Number Breakdown

MTP® connector	Cable Type	Cable assembly polarity scheme	MTP® Low Loss connector	Cable performance	No of fibres(1)	Length (m)
ST, or STM (with pins)	Compact = C	A B C	T, or TM (with pins)	OM3 or OM4, or 108*	12 24 48	ZZZ Z

\* SMF terminations are angled polished

Example Part Number: STCBTOM4120050 = Pre-Terminated MTP-MTP assembly (unpinned), B polarity, OM4 12 fibre, 5m overall length

### Breakout Cable Assemblies

The micro-distribution cables used in the cable array assemblies are smaller and lighter than conventional optical cable products. This offers the added benefits of reducing the space taken in pathways, lightening loads in trays, and minimising the possibility of adversely affecting cooling under-floor air flows by creating air dams in cable pathways. MTP® Hybrid breakout units are made up of 12 fibres LSHF jacketed cables terminated at one end in pinned MTP® Low Loss uniboot connectors. This passes through a bifurcation unit, to LC duplex low loss connectors (high precision SM tolerance versions) terminated to 2mm OD simplex cables. These are used to connect equipment in racks to MTP® terminated backbone cables. The assemblies are available in OM3, OM4 and OS2 performance grade fibre.

#### Product Part Numbers

MTP® Low Loss connector with pins(2)	Duplex Low Loss connector	Cable performance	Number of fibres	Overall length (m) <sup>(1)</sup>
HT - MTP without pins HTM - MTP with pins	LC	OM3 or OM4 or 108	12	ZZZ

(1) breakout unit legs are a standard 1m long, (2) SMF terminations are angled polished

Example Part Number: HTMLCOM412020 = Pre-Terminated MTP-LC uni-boot breakout assembly (pinned), OM4 12 fibre, 2m overall length

MT Connect is a high performance, pre-terminated, modular, Optical Fibre cabling system based on MT ferrule connector technology. MT ferrule is the building block of the system, it accommodates up to 12 fibres in a single ferrule. The array is made of a precision moulded thermoplastic and uses metal guide pins, precise housing dimensions and keying to ensure fibre alignment and maintenance of polarity when mating. The housing uses a push-pull latching mechanism, with audible click, to ensure proper connection.

Our product set may be used in the general office to speed the installation of backbone cabling links, in horizontal fibre to the desk or in the datacentre where multiple,

point to point, fibre connections between distribution racks and equipment racks can be quickly and efficiently installed, maintained and changed as required.

The MT Connect system has unique advantages over conventional optical fibre cabling:

- Pre-terminated cables with 12 fibres per connector ensure faster installation of multiple fibre links.
- Smaller diameter cables saving space in pathways and racks giving more space for air circulation.

- Modular construction suited to the move, add and change environment and simple, fast maintenance and repair.

- End to end link performance and product quality assured by factory termination of connectors.

MT Connect is available in OM3, OM4 or OS1 performance grade cabling and comprises a set of parts which enable any configuration of link to be simply and quickly built.

MTP

Panel Assemblies

These modular panel assemblies are used to terminate backbone cables at the distributor or equipment outlet ends and also to interface to patch cords or equipment cords.

The 1U panel fits into standard 19" racks and accommodates up to 4 plug in units. LGX cassettes, MTP® adaptor plates, LC 24 fibre faceplates or blanking plates or 5 port Snap-in-Jack faceplates are available as units.

The 3U panel fits into standard 19" racks and accommodates up to 288 fibres using up to 12 cassettes to offer a high density solution. The panel can also accommodate 5 port Snap-in-Jack faceplates to offer a versatile hybrid configuration. Cable management is attached on to the front of the panel to act as a support for the cabling with the fixed labelling tray, located on the front of the panel.

The panels are ideal for data centre installations where multiple point to point fibre connections between distribution racks and racks can be installed, maintained and changed quickly and efficiently.

The MTP® system is simple and flexible and can accommodate up to 96 LC connections per U using LGX cassettes, or up to 288 connections per U using MTP® adaptor plates.

LGX cassettes are available in high performance OM3, enhanced OM4 and OS1/OS2 types.

MTP

**Breakout Assemblies**

MTP® Hybrid breakout units are made up of 12 fibres LSHF jacketed cables terminated at one end in pinned MTP® Low Loss connectors, through a bifurcation unit, to LC duplex low loss connectors (high precision SM tolerance versions) terminated to 2mm OD simplex cables.

These are used to connect equipment in racks to MTP® terminated backbone cables. The assemblies are available in OM3, enhanced OM4 and OS1/OS2 performance grade. Breakout Assemblies are also available with staggered leg lengths for ease of installation where the legs of the breakout assembly are tailored to fit; the part number then becomes a unique reference for the type of breakout required.

Please see examples below for ordering information.

Product Part Numbers

MTP® Low Loss connector with pins(2)	Duplex Low Loss connector	Cable performance	Number of fibres	Overall length (m) <sup>(1)</sup>
ST, or STM (with pins)	LC	OM3 OM4 108	12	ZZZ

(1) breakout unit legs are a standard 1m long (2) SMF terminations are angled polished

Example Part Number: STMLCOM312025 = Pre-Terminated MTP-LC duplex breakout assembly (pinned), OM3 12 fibre, 2.5m overall length

MTP

**Cable Assemblies**

Cable assemblies are made up of 12 fibre LSHF jacketed cables terminated at both ends in MTP® Low Loss connectors (without pins). They are ideal for use as back bone or horizontal cable interconnections between distribution racks.

The assemblies are available in OM3, enhanced OM4, and OS1/OS2 to suit the needs of every network.

The cable assemblies are available in standard lengths of 1, 3, 5, 10, 20, 30, 50 and 100m. Custom engineered lengths are also available on request. The assemblies are delivered as coils in lengths up to 50m and on reels in lengths over 50m.

Single mode cables are yellow.

OM3 Multimode cables are aqua.

OM4 Multimode cables are heather violet.

Part Number Breakdown

MTP® connector	Cable Type	Cable assembly polarity scheme	MTP® Low Loss connector	Cable performance	No of fibres(1)	Length (m)
ST, or STM (with pins)	Compact = C	A B C	T, or TM (with pins)	OM3, or OM4, or 108*	12 24 48	ZZZ Z

\* SMF terminations are angled polished

Example Part Number: STCBTOM4120050 = Pre-Terminated MTP-MTP assembly (unpinned), B polarity, OM4 12 fibre, 5m overall length

MPO

Panel Assemblies

Modular panel assemblies are used to terminate backbone cables at the distributor or the equipment outlet ends and also to interface to patch cords or equipment cords.

The 1U panel fits into standard 19" racks and accommodates up to 4 plug in units. LGX boxes, MPO adaptor plates, 5 Port Snap-in-Jack faceplates and blanking plates are available as units.

The system is simple and flexible and accommodates up to 288 fibre terminations in 1U. Up to 24 quad LC connections per U can be provided using LGX modules. Or, up to 288 connections per U can be achieved using 4 of the 6 way MPO adaptor plates.

The LGX boxes are available in high performance OM3, OM4 or OS1 (108) types.

Description	Part Number
19" Panel with four apertures on the front face for clipping in modules, blanks or adaptor plates	MTPHD2
19" Panel with twelve apertures in the front face for clipping in modules, blanks or adapter plates	MTPHD3U122
LGX 'clip in' module with a pinned MPO at the rear, 12 LCs on the front face, OM3 performance	MTC AHD ML OM3 122
LGX 'clip in' module with 2 pinned MPOs at the rear, 24 LCs on the front face, OM3 performance	MTC AHD ML OM3 242
LGX 'clip in' module with a pinned MPO at the rear, 12 LCs on the front face, OM4 performance	MTC AHD ML OM4 122
LGX 'clip in' module with 2 pinned MPOs at the rear, 24 LCs on the front face, OM4 performance	MTC AHD ML OM4 242
LGX 'clip in' module with a pinned MPO at the rear, 12 LCs on the front face, OS1 performance	MTC AHD ML 008 122

Category 6 Shielded Tool free jack	C6CJAKS000DC
Category 6 Unshielded Tool free jack	C6CJAKU002

MPO

Breakout Assemblies

MPO hybrid breakout unit is made up a 12 fibre LSHF jacketed cable terminated at one end in MPO connectors, through a bifurcation unit, to SC or LC connectors terminated on 2mm OD simplex cables. These are used to connect equipment in racks to MPO terminated backbone cables. The assemblies are available in OM3, OM4 or OS1 (108) performance grade

Ordering Information:

The assemblies are available in standard lengths of 2m & 3m as standard. Custom engineered lengths are also available on request. The assemblies are delivered as coils.

Part Number Breakdown:

MPO Connector with pins	Duplex Connector	Cable performance	Number of fibres	Overall length (m) <sup>(1)</sup>
MTM	LC or SC	OM3 or OM4 or 108	12	ZZ

(1) Breakout unit legs are a standard 1m long.

Example Part Number: MTMLCOM31203 = Pre-Terminated MPO-LC assembly (pinned), OM3 12 fibre, 3m overall length

MPO

**Cable Assemblies**

An MPO cable assembly is made up of 12 fibre LSHF jacketed cable terminated at both ends in MPO connectors (without pins). These are used as backbone or horizontal cable interconnections between distribution racks. The assemblies are available in a range of performance levels (OM3, OM4 or OS1 (108) types) and in different lengths to suit the needs of the network.

**Ordering Information:**

Assemblies are available in standard lengths of 1, 3, 5, 10, 20, 30, 50 and 100m. Custom engineered lengths are also available on request. Assemblies are delivered as coils in lengths up to 50m long and on reels in lengths over 50m.

Singlemode cables are yellow.

OM3 Multi mode cables are aqua.

OM4 Multi mode cables are heather violet.

**Part Number Breakdown:**

MPO Connector	Cable type	Cable Assembly	MPO Connector	Cable performance	Number of fibres(1)	ZZZ
MT or MTM (with pins)	C = compact cable	A B C	MT or MTM (with pins)	OM3, or OM4, or 108	12	length (m)

(1) Other numbers of fibres are available on request, e.g. 8 ways. In 8 fibre assemblies fibre positions 1, 2, 3, 4 & 9, 10, 11, 12 are normally terminated in the 12 way array connector.

Example Part Number: MTCCTOM312010 = Pre-Terminated MPO-MPO assembly (unpinned), C polarity, OM3 12 fibre, 10m overall length

The Brand-Rex datacentre cabinets and racks range offers the ultimate solution for management of fibre and copper in datacentres and telecoms rooms. The unique, flexible and effective range is the ideal solution to support the mission critical applications of the modern day Data Centre.

These ground breaking solutions have been designed, in conjunction with customers, with an emphasis on minimising on-site installation times, improving accessibility to cabling and to providing modularity to enhance the overall operational flexibility.

The High Density Solutions are designed to solve the problems of today's networking environment, providing unique working and cabling accessibility to completely transform cabinet installation layouts, onsite installation and on-going system management.

## High Density Fibre Management Cabinet

The Brand-Rex High Density Fibre Cabinet and Panel offers the ultimate solution for management of fibre in datacentres and telecoms rooms. The 17inch frame solution is designed with an emphasis on minimising on-site installation times, accessibility to cabling and modularity to enhance its operational flexibility.

Description	Part Number
Configuration 1 - Stand Alone HDFC – 1 x Standard High Density Fibre Cabinet (HDFC) Frame DRCRAK45U0905FX2 - 45U x 900mm (W) x 500mm (D) - Black (Including Double Doors, Side Panels, Top Panel, U Label, Document Wallet)	DRCRAK45U0905F12
Configuration 2 - 'Back to Back' HDFC – 2 x Standard High Density Fibre Cabinet (HDFC) Frame DRCRAK45U0905FX2 - 45U x 900mm (W) x 500mm (D) - Black (Including Double Doors, Side Panels, Top Panels, Centre Panels, Baying Kits, U Labels, Document Wallets)	DRCRAK45U0905F22
Configuration 3 - 'Side to Side' HDFC – 2 x Standard High Density Fibre Cabinet (HDFC) Frame DRCRAK45U0905FX2 - 45U x 900mm (W) x 500mm (D) - Black (Including Double Doors, Side Panels, Top Panels, Bolt together Kits, U Labels, Document Wallets)	DRCRAK45U0905F32
Configuration 4 - 'Back to Back' and 'Side to Side' HDFC – 4 x Standard High Density Fibre Cabinet (HDFC) Frame DRCRAK45U0905FX2 - 45U x 900mm (W) x 500mm (D) - Black (Including Double Doors, Side Panels, Top Panels, Centre Panels, Baying Kits, Bolt Together Kits, U Labels, Document Wallets)	DRCRAK45U0905F42
Configuration 5 - 'Back to Back' HDC and HDFC Frame – 1 x Standard High Density Fibre Cabinet (HDFC) Frame DRCRAK45U0905FX2 and 1 x Standard HDC Frame DRCRAK45U0905A2 - Black (Including Double Doors, Side Panels, Top Panels, Centre Panels, Baying Kits, U Labels, Document Wallets)	DRCRAK45U0905H52

## High Density Copper Cabling Cabinet

The High Density Copper Cabling Cabinet offers the ultimate solution for management of cross-connect cabling in datacentres and telecoms rooms. The cabinet offers the ability to create a preferred enclosure design configuration that fits the needs of today's working environment. To tailor a solution to your requirements simply begin with the basic frame and subsequently add doors, side panels and top panels as required. The range also has a comprehensive array of accessories to suit all applications. If you have any problems please contact our expert customer service team for technical assistance.

Description	Part Number
Configuration 1 - Stand Alone HDC Frame - 45U x 900mm Wide x 500mm Deep - Black (Including pallet AND All BR recommended Accessories - Double Doors, Side Panels, Top Panel, Through Troughs, Twist and locks, Earth Kit, U Label, Document Wallet)	DRCRAK45U0905C12
Configuration 2 - 'Back to Back' HDC Frame - 2 x Standard HDC Frame DRCRAK45U0905A2 - 45Ux900mmx500mm - Black (Including pallet AND All BR recommended Accessories- Double Doors, Side Panels, Top Panels, Through Troughs, Twist and locks, Earth Kits, U Labels, Document Wallets, Baying Kits)	DRCRAK45U0905C22
Configuration 3 - 'Side to Side' HDC Frame - 2 x Standard HDC Frame DRCRAK45U0905A2 - 45Ux900mmx500mm - Black (Including pallet AND All BR recommended Accessories- Double Doors, Side Panels, Top Panels, Through Troughs, Twist and locks, Earth Kits, U Labels, Document Wallets, Bolt Together Kits)	DRCRAK45U0905C32
Configuration 4 - 'Back to Back' and 'Side to Side' HDC Frame - 4 x Standard HDC Frame DRCRAK45U0905A2 - 45Ux900mmx500mm - Black (Including pallet AND All BR recommended Accessories- Double Doors, Side Panels, Top Panels, Through Troughs, Twist and locks, Earth Kits, U Labels, Document Wallets, Bolt Together Kits, Baying kits)	DRCRAK45U0905C42
Configuration 5 - 'Back to Back' HDC and HDFC Frame - 1 x Standard HDFC Frame DRCRAK45U0905FX2 - 45Ux900mmx500mm - Black AND 1 x Standard HDC Frame DRCRAK45U0905A2 - 45Ux900mmx500mm Black (Including Double Doors, Side Panels, Top Panels, Centre Panels, Baying Kits, Bolt Together Kits, U Labels, Document Wallets)	DRCRAK45U0905H52

Floor Fixing Kit for HDC/HDFC Racks (Concrete Floor)	DRCKITFLR001

## High Density Distribution Equipment Rack (DER)

The Distribution Equipment Rack (DER) provides increased accessibility and has a flexible modular design that can be configured to suit small, corporate and internet datacentres. The DER set can be configured as an open frame to manage the cabling at the distributors or as a closed cabinet to safely secure servers and storage equipment. The designs are modular and flexible.

The logic of the modular, flexible systems are the key benefits of this best in class cable and equipment management system range. Features also include vented and glass door options, side panels and top panels with cable access. These cabinets have an unparalleled level of flexibility, providing the end user with the right cabinet for the right application.

Description	Part Number	Description	Part Number
Configuration 1 - Stand Alone DER Frame - Black, 42U, 600x1000, c/w Standard Corner Plates ,Jacking Feet, 19" Rails, Vented Steel Doors, Plain Side Panels, Top Panel (Split -2xPlain Panels 1xVented Panel), Earth Kit. Black Panels c/w Black Trim	DRCRAK42U0610D12	1 Set of twin Plain side panels, (BlackSteel),42U high, 875mm deep	DRCTRY42U0155P

**High Density Open Entry Rack**

The Open Entry Rack (OER) offers a simple, modular and easy-to-install system that can also be applied to small, corporate and internet datacentre environments. It can be used stand-alone or in multiples. It is an ideal solution for the main distribution area. The modular and scaleable design of the OER offers numerous options and solutions to deal with issues of cable access and routing that are common to today's high data rate networks and high performance cabling. It offers the user a simple, modular and easy-to-install system featuring smart, effective cable management options and built-in flexibility to cope with copper or optical cabling.

The combination of completely interchangeable cable retention gates, doors, fingers and accessories allows the user to customise OER to adapt his or her own specific needs. Also, reconfiguration and modification of the OER system is done easily in the field after the system is installed, which makes the OER a great choice for cable management needs now, and in the future.

Description	Part Number
Open Entry Rack 30U - 2 Post Frame	DRCFRMOER30UA2
Open Entry Rack 45U - 2 Post Frame	DRCFRMOER45UA2
Configuration 1 - includes 1 x 30U OER, 2 x Open Entry Rack 6" Single Sided High Density Cable Management 30U	DRCFRMOER30U12
Configuration 2 - includes 1 x 45U OER, 2 x Open Entry Rack 6" Single Sided High Density Cable Management 45U	DRCFRMOER45U22
6" Single Sided High Density Cable Management 30U	DRCSSCM30U2
6" Single Sided High Density Cable Management 45U	DRCSSCM45U2
1U 19" Finger Cable Management Bar	DRCFRM1UCM2
19" Finger Cable Management Bar	DRCFRM2UCM2 2U
3U 19" Finger Cable Management Bar	DRCFRM3UCM2
Cable Management Spools	DRCACCCMS001

In today's world of high speed connectivity the importance of Information Communication Technology (ICT) services is business critical. The introduction of best practice standards for this service management and with the dependency on the availability of information continually increasing, businesses are required to be proactive in relation to these ever changing developments.

At the core of any IT Service Management framework are the configuration, change and incident management processes. The accuracy and quality of the information contained within the main configuration is vital in ensuring the effectiveness, efficiency and quality of all associated applications.

Traditionally, configuration management is one of the most difficult disciplines to implement due to the manual effort needed to maintain accurate records of the constant changes to the IT infrastructure. The management of changes is also highly critical, as service delivery managers must know the exact implications of carrying out any changes before they take place.

SmartPatch has been designed with these challenges in mind. It is a solution that is universally recognised for the ultimate levels of flexibility, efficiency and network security it provides.

The system provides simple and controlled management and recording of common network changes such as those forced by office moves and terminal additions.

SmartPatch also gives multi-site businesses the tools to effectively monitor and manage all sites from a central location.

#### **System Benefits**

- Reduced Cost and Increased Effectiveness of IT Operations
- A Platform for High Availability
- Network Management Services
- Improved Customer Responsiveness
- Improved Information Quality
- Enhanced Physical Security

**SmartPatch Advanced Scanner Hardware**

The SmartPatch Network Scanner from Brand-Rex connects the Intelligent patching panels to the SmartPatch connectivity management software. The network scanner can be mounted as a 1U device or in a zero “U” configuration. The SmartPatch Network Scanner is suitable for installation in equipment racks or cabinets for use with all approved Brand-Rex IPS panels.

Description	Part Number
1U Network Scanner - Black	IPSRTU1U2
Zero U Network Scanner - Black	IPSRTU0U2

**SmartPatch Intelligent Copper Patch Panels**

SmartPatch IPS Copper Patch Panels offer 24 ports per 1U and include integrated cable management features. The intelligent ready panel can be loaded with an RFID antenna, providing the ability to monitor and record the patching status. This information is communicated back to the software via a network scanner. The LED's above each port are used to trace connectivity or to offer patching guidance to the engineer.

Description	Part Number
1U 24 SJ Inline Copper panel (IMS Ready) - Black	IPSPNLX24SJ2M-X
1U 24 SJ Inline Copper panel (IMS) - Black	IPSPNLX24SJ2M

**SmartPatch Intelligent Fibre Panels**

The SmartPatch 1U fibre 19” Optic Patch Panels have been designed to optimise both the internal fibre management but also to add greater fibre density. The Patch Panel offers a flexible and highly versatile solution for optical splicing and patching. The integrated design features ensure that even once installed panels can be readily reconfigured to accommodate the changing needs of today’s high speed networks. The intelligent ready panel can be loaded with an RFID antenna, providing the ability to monitor and record the patching status. This information is communicated back to the software via a network scanner. The LED’s above each port are used to trace connectivity or to offer patching guidance to the engineer.

Description	Part Number
1U 48f LC Duplex Multimode Fibre panel IMS Ready (MM) - Black	IPSC1SXMM48LC2-X
1U 48f LC Duplex Single mode Fibre panel IMS Ready (SM) - Black	IPSC1SXSM48LC2-X
1U 48f LC Duplex Multimode Fibre panel IMS (MM) - Black	IPSC1SXMM48LC2
1U 48f LC Duplex Single mode Fibre panel IMS (SM) - Black	IPSC1SXSM48LC2

**SmartPatch IPS Retrofit Antenna**

The SmartPatch Intelligent Patching System (IPS) RFID antenna kit for Copper and Fibre allows customers to migrate from the Brand-Rex ready solution to fully intelligent panels.

Description	Part Number
Copper Antenna KIT - Black	IPSATTRFID001
Fibre Antenna KIT with Jump Lead - Black	IPSATTRFID002

**SmartPatch Retrofit RFID Clip for Fibre Patch Cord**

A specially designed fibre clip transforms standard Brand-Rex patch cords into intelligent cords fully integrating them into the SmartPatch system. These clips can be mounted easily at any stage in the process even if the live connections are already established. Within the clip a powerful unique RFID tag is integrated which can store additional information including length, measurement reports, location, etc.

Description	Part Number
RFID Clip LC Fibre Patch Cord Clip - Transparent	IPSPCCLPLCD

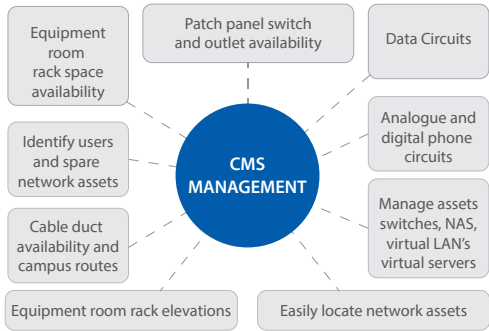

**SmartPatch Retrofit RFID Clip for Copper Patch Cord**

The unique retrofit clip forms the key in connecting your standard 8 wire patch leads to the SmartPatch intelligent patching system. This clip is compatible with Brand-Rex Cat6Plus and 10GPlus screened cords providing the system with intelligent information. These clips can be mounted easily at any stage in the process even if the live connections are already established. Within the clip a powerful and unique RFID tag is integrated which can store additional information such as, length, measurement reports, location, etc.

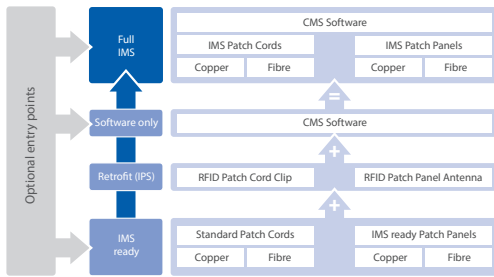

Description	Part Number
RFID Copper Patch Cord Clip 10GPlus - Blue	IPSPCCHB004

Connectivity Management Software (CMS)

The connectivity management software can be utilised as a standalone offering to support your End to End infrastructure or combined with the intelligent patching system to fully support Data Centre, outside plant or office network management. The software element of CMS not only allows the monitoring and management of physical connectivity, the availability of a fully transparent API means the benefits of accurate, real time information can also be integrated into the most commonly available networks, facilities, configurations and helpdesk management applications.

In medium to large networks, maintaining a high level of information on single or multiple locations can be difficult. The CMS makes it easy to enter, update and understand the connectivity availability of the network. The user friendly interface ensures an effortless and rapid ability to establish and inspect connections within splice enclosures, patch panels, optical network devices and passive optic network (PON) splitters used in FTTx applications. The flexibility of the software allows IT managers to establish a named cable path from one part of the network to another.

Even though it encompasses many elements such as copper, fibre, splices and ports, this named circuit can be managed as a single entity within the network, and can include point-to-point connectivity between the central office, NOC or POP and a customer site. The Connectivity Management Software also allows maps, drawing files or .pdf/images to be imported ensuring the user can customise the network relative to specific area and location requirements.

Connectivity Management interface enables users to:

- Generate and maintain campus map layouts
- Design and manage your campus backbone cabling
- Visualise the paths of cables through a campus
- Easily manage fibre backbone availability
- Manage cabling and assets in manholes
- Manage fibre splicing and air blown fibre
- Generate routes for new cables

CMS software (In-house)

Description	Part Number	
SmartPatch enhanced software - Server-In-house-20 racks	IPSSWSVR20R	Basic Requirement*
SmartPatch enhanced software - Server - In-house - Racks Expansion to 30 racks (10 racks expansion)	IPSSWSVRA1RE	Extension package possibilities when using IPSSWSVR20R as the basic requirement
SmartPatch enhanced software - Server - In-house - Racks Expansion from 31 to 390 racks (10 racks expansion from 31 to 390 racks)	IPSSWSVRA2RE	
SmartPatch enhanced software - Server-In-house - Racks Expansion from 391 racks (10 racks expansion from 391 racks)	IPSSWSVRA3RE	
SmartPatch Managed Ports 500 ports	IPSSWSVRA5P	

Feature upgrade CMS software (In-house)

Description	Part Number	
SmartPatch enhanced software - Server - In-house - Feature Upgrade to 30 racks	IPSSWSVRA1RFU	Upgrade package possibilities when using IPSSWSVR20R as the basic requirement
SmartPatch enhanced software - Server - In-house - Feature Upgrade from 31 to 390 racks (10 racks expansion from 31 to 390 racks)	IPSSWSVRA2FU	
SmartPatch enhanced software - Server - In-house - Feature Upgrade from 391 racks (10 racks expansion from 391 racks)	IPSSWSVRA3FU	

The often daily moves, adds and changes in the enterprise align the network equipment with user needs and ensure they are supporting disciplined process management. The software provides a solution to easily manage assets and connectivity from equipment rooms and Data Centre floors to the workspace environment while also efficiently supporting the physical network.

Providing a powerful solution for the management of Data Centre floors, racks, IT assets, energy resources and end-to-end cabling - assisting the user to:

- Manage end user space in collocation Data Centre
- Manage and plan rack space usage and power consumption
- Manage the lifecycle of Data Centre assets
- Manage Data Centre floor space
- Manage the impact of loss of power and network connectivity
- Manage 'Moves,' 'Adds' and 'Changes' efficiently
- Data mine assets and connectivity for engineering and management reporting

### CMS bridge software (In-house)

Description	Part Number	
SmartPatch enhanced software - Server - In-house - GIS integration	IPSSWSVRGISI	System integration possibilities when using IPSSWSVR20R as the basic requirement
SmartPatch enhanced software - In-house - Switch Data Synchronization Bridge	IPSSWSVRSDIB
