

Wireless HDMI extenders

ATEN wireless extenders perfectly stream Full HD digital content from multiple sources to multiple TVs without any cables necessary. The extenders ideally fit multipurpose rooms that require high flexibility in furniture positioning or home entertainment systems deployed in one to multiple rooms. ATEN wireless extenders transmit within a range of 30m from the source, being it from a Blu-ray player, PC, media player, PlayStation, set-top box, digicoder or any other multimedia device.

LOCATION FLEXIBILITY

Wireless WHDI technology transmits HDMI signals from transmitter to receiver up to 30m. Place displays neatly in a central location or on a movable platform. Keep sources hidden from sight.

PLUG-AND-PLAY

Connect several FullHD displays and sources to setup a multimedia environment controlled by infrared and with 5.1 channel sound system.

HIGH PERFORMANCE

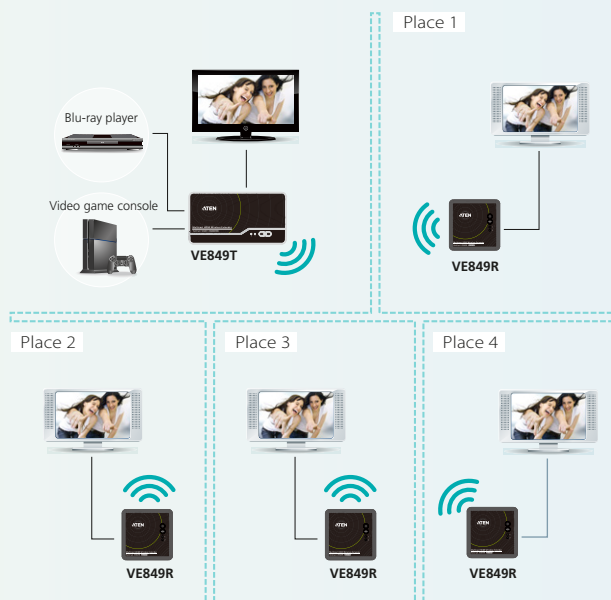

The WHDI protocol ensure a bandwidth of 6,75 Gbps, with less than 1ms latency. Content is securely transmitted, being protected by the HDCP protocol.

VE849

Multicast wireless HDMI extender / switch

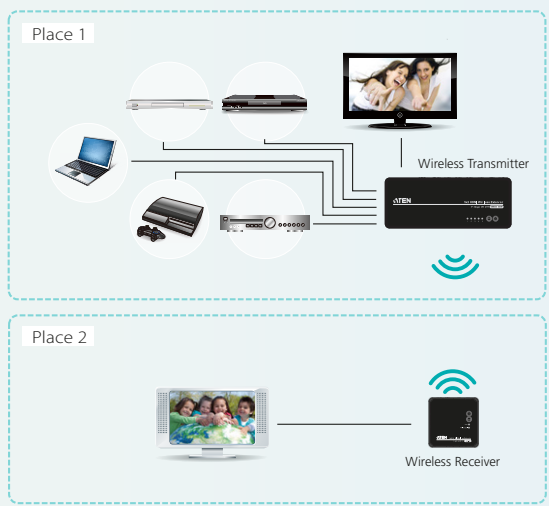

- 2 inputs
- 5 outputs - 1 local and 4 remote
- Multicast: 1 transmitter streams to 4 receivers simultaneously

VE829
Wireless
