## ATEN Boundless Switching for Any-Scale Multi-System Environments

## Smooth Mouse Switching Control, More Intuitive than Ever!

The best solution for professional multi-system operators!

Simply move your mouse across displays or window borders to switch the control between different computers instantly.

## Intuitive Mouse Switching

Simply move the mouse cursor across the border and onto the target computer display to switch the control from one computer to the next.

## Unrestricted Switching Direction

ATEN Boundless Switching allows the mouse cursor to move in any direction to switch the control focus without any limitations.

and **More...**

## Flexible Display Layout with Simple Set Up

ATEN provides a simple method for setup and configuration that allows users to customize their specific monitor layout at the desktop or workstation.

## Diverse Options for Desktop, Over IP Matrix or Multi-view KVM

ATEN offers a wide product range for every imaginable boundless switching scenario, no matter whether it's switching across windows or switching across displays.

Across Displays

Across Windows

## Mouse Position Highlight

On the ATEN KE KVM over IP Matrix series, the Boundless Switching function features a distinctive on-screen indicator for instant identification of the control PC via the CCKM, so you never lose your focus in multiple displays.
