

FW-7541

Compact Desktop Network Appliance with Dual Core Intel ATOM D525 CPU and Six GbE Network

Features

Environmentally Friendly and Cost Effective

The FW-7541 is built entirely with RoHS compliant parts and production processes. An embedded ultra-low voltage ATOM 1.8GHz CPU delivers power-efficient processing while the Intel ICH8M system logic provides PCI-E bus network bandwidth.

Expansive I/O interface and Internal Storage

The FW-7541 includes an internal 2.5" HDD, CF Socket, USB 2.0 ports, Mini-PCIe and console connection options; it also comes with six integrated GbE ports with optional bypass and can be easily deployed in front-line security

applications where reliability and availability are of key concern.

Fanless Platform with Reduced Power Consumption

Measuring only 40 mm in height, the FW-7541 can be deployed virtually anywhere. Its space-saving design offers flexibility and cost savings while maintaining the high throughput and availability required for network security, acceleration and other network applications. Also the corrugated aluminum casing allow heat to dissipate off the top of the platform allowing for a fanless design.

Dimensions: 268 x 40 x 145 mm
