Fiber Optic Network Solutions

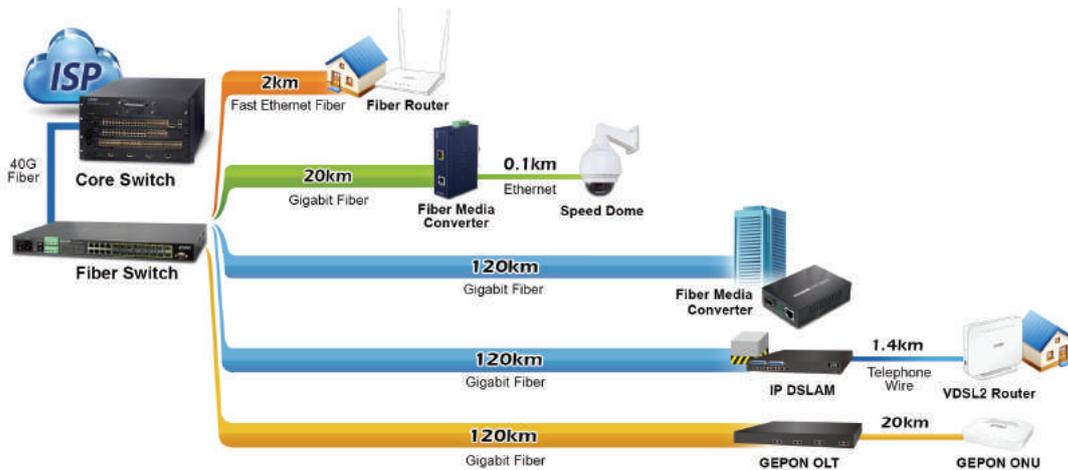

Comprehensive Solutions from the Edge to the Core

Introduction

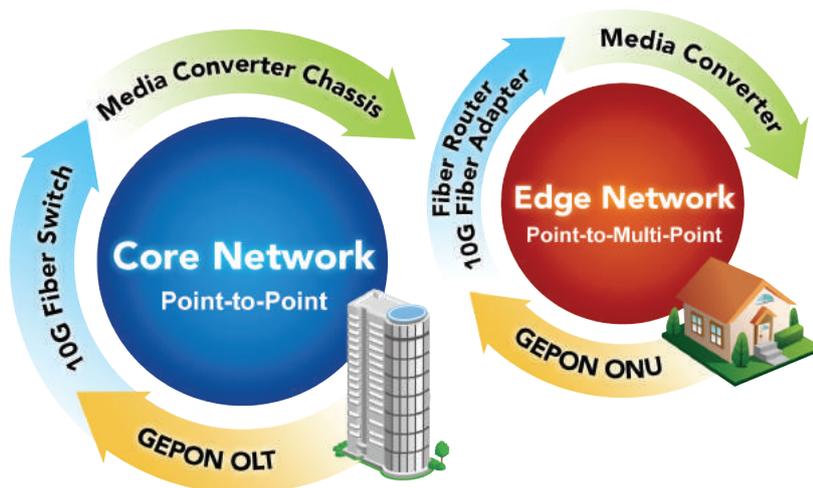

In the broadband communication, the fiber optic network deployment is increasingly applied to today's cloud applications and high-demanding multimedia streaming service. The fiber optic transmission has large advantages over the existing copper wire as the optic fiber cable carries much lower attenuation and interference. However, compared to the existing copper or UTP cable, fiber optic is relatively expensive and difficult to be widely deployed in a short period of time. Besides, fiber optic system is usually employed by core networks such as telecommunications, campuses and hospitals, utilizing fiber switches, media converters, GEAPON passive optic devices, and more. There are various available ways to efficiently deploy fiber connectivity network.

Comprehensive Solutions from the Edge to the Core

Through decades of experience in IP networking and fiber communication, PLANET has developed a comprehensive fiber connectivity solution to help ISPs and telecoms quickly construct broadband service as well as the fast connectivity to the edge.

PLANET provides a broad range of fiber-related product lines adapting to all kinds of work environments. PLANET delivers solutions to fiber connectivity in commercial, carrier grade, and especially industrial level products for stable networking in wide operating temperature. In the Chile's miners rescue mission in 2010, PLANET fiber solution successfully assisted the miners trapped in a 624-meter tunnel in hopes of looking for lives via visual and voice communication with their families and rescue team.

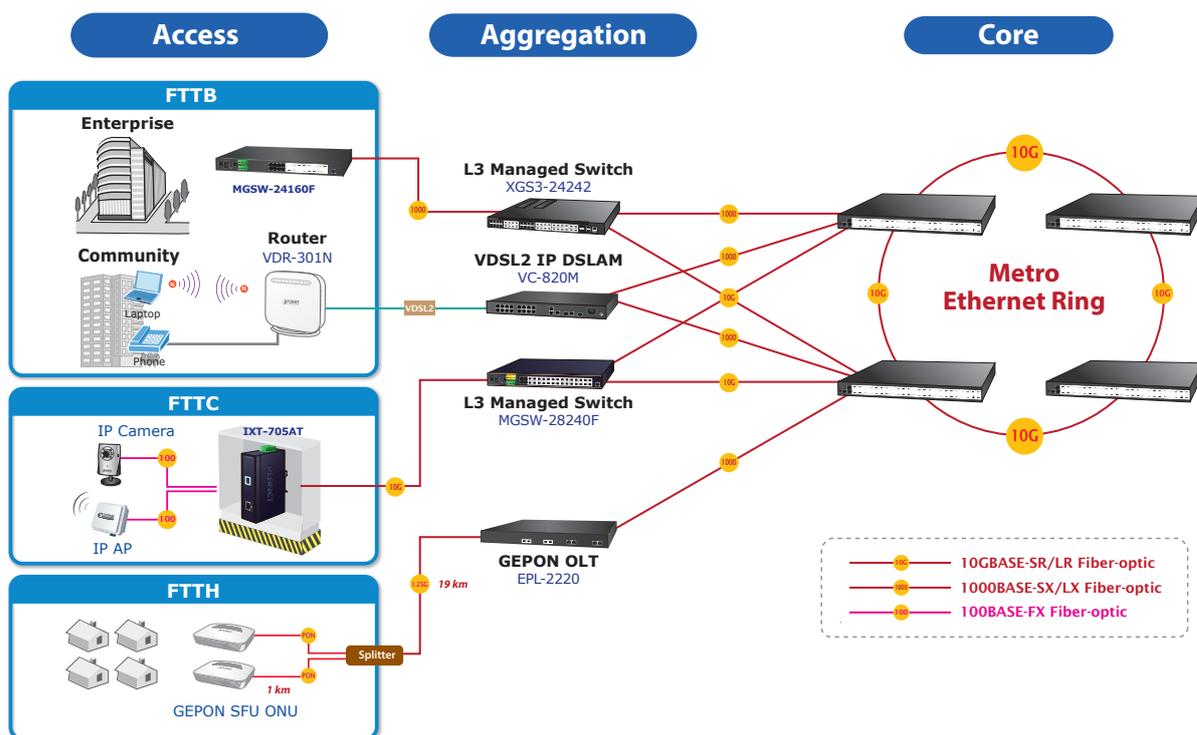

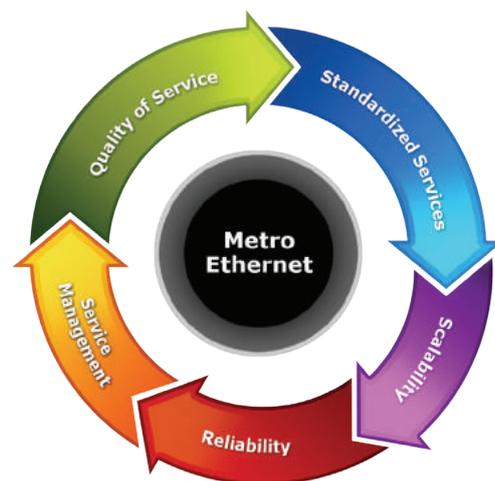

Metro Fiber Switches

To improve the technology of Optical Fiber Ethernet with highly-flexible, highly-extendable and easy-to-install features, the data exchange speed of Optical Fiber Ethernet is up to 100Gbps and the distance of Gigabit Optical Fiber is up to 120km. PLANET provides many kinds of Point-to-Multi Point Managed Fiber Switches and CPE especially for Metro Ethernet applications. The benefits of Metro Ethernet Switches include not only professional Internet Management Technology, such as IPv6/IPv4 Dual-Stack, Q-in-Q VLAN, Multicast, QoS, Security and High Availability, but also Optical Ethernet Internet Architecture up to 100Gbps to meet the needs of high-bandwidth multi-media. PLANET Metro Ethernet Switch Solution is the best choice to connect the enterprise, community and campus in the metropolitan area to backbone network for service providers.

The Advantages of Metro Ethernet

- Long distance and better quality of transmission for Optical Ethernet: the distance up to 120km between points
- Lower cost for installation of Gigabit Ethernet and 10Gigabit Ethernet
- Easy Internet architecture, the same and simple Protocol from LAN to MAN
- Flexible bandwidth management based on customers' demands
- Meeting the demands for high bandwidth triple-play service

Metro Fiber Switches

Industrial Fiber Switches & Media Converters

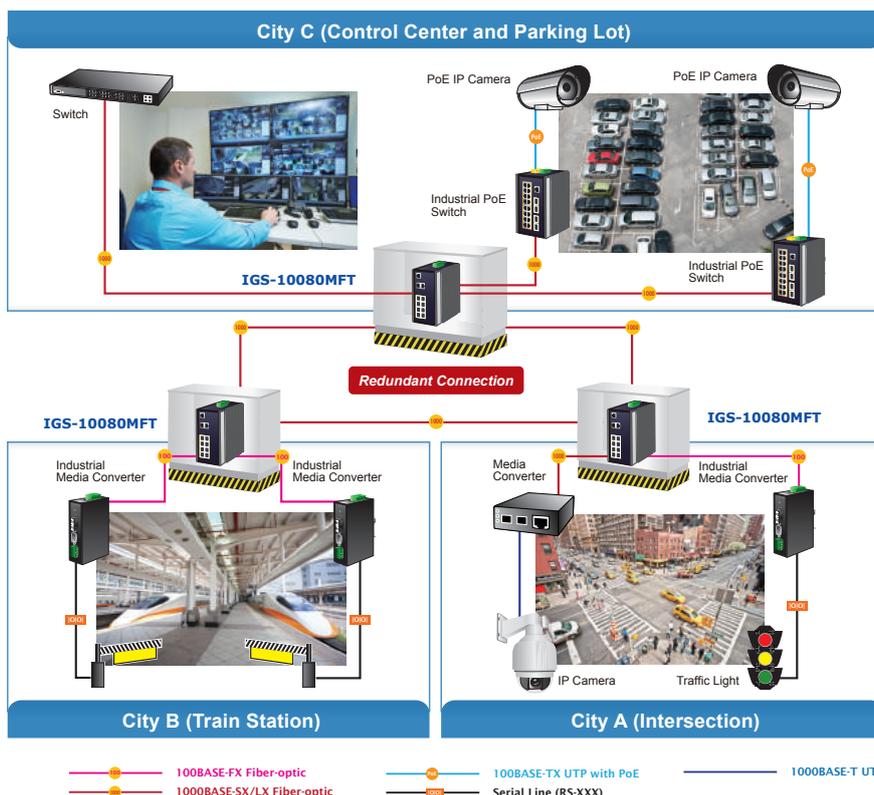

PLANET Industrial Ethernet Solution offers high reliability and security to ensure continuous industrial operation in harsh environments such as factory floors, outdoors, and places with extreme temperatures. The Industrial Ethernet upgrades the traditional, proprietary factory-floor networks to a low-cost, high-performance, and scalable architecture. PLANET Industrial Ethernet switches and converters integrate 100/1000 Fiber technology with highly-reliable and long-reach data transmission. PLANET provides suitable product portfolio for information level, control level, and device level in the Industrial Ethernet network.

Fiber-Optic Link Capability Extends the Range of Network Deployment

The SFP slots built in with PLANET Industrial Fiber Switches are compatible with 100BASE-FX or 1000BASE-SX/LX/WDM through SFP (Small Form Factor Pluggable) fiber-optic transceivers. The fiber-optic uplink capability guarantees the throughput to all nodes hooked into the network and the Gigabit Ethernet distance can be extended from 550 meters (Multi-mode fiber cable) up to 10/20/30/40/50/70/120 kilometers (Single-mode fiber or WDM fiber).

Media Converters

Media conversion is a cost-effective solution to extending fiber networking rapidly rather than adopting optic fiber only. It also efficiently helps to solve the distance limit between the Ethernet and Local Area Network. With the feature-rich chassis provided by PLANET, at least 16 converters can easily expand the fiber-optic networks by simply plug and play. The wiring distance of PLANET media converter chassis is extendable from 2 to 120 kilometers and available upon request as well.

Building a network solution of FTTH (Fiber to the Home) or FTTC (Fiber to the Curb) for ISPs, the PLANET Managed family of chassis and FST/GST series converters offer the multiple selections for FTTx deployment. The Managed family is a series of managed Media Conversion Center that provides hot plug and play slots for various types of converters. Through the management interface, the entire status of the converters could be remotely controlled within the chassis from on/off and status/statistics of ports, as well as the advanced features like redundant links.

Managed Media Converter Chassis

The MC-1610MR series is ideal for telecom and corporate applications where a number of fiber links need to be managed and controlled from a central location. The management function provided by the MC-1610MR series enables network administrators to monitor media converter connection status and configure the converters remotely via web browser or locally. Through the management interface, the entire status of the converters such as link on/off or statistics of the port will be clearly demonstrated and monitored.

| Managed Media Converter Chassis | | |
|---------------------------------|--|---|
| Model | MC-1610MR | MC-1610MR48 |
| Product Image |  |  |
| | Managed | Managed |
| Slots | 16 converter open slots; 2 power slots (1 loaded) | |
| Dimensions (W x D x H) | 440 x 350 x 88 mm; 2U | |
| Power Requirements | 100 ~ 240V AC, 50/60Hz | -48V DC (-30 ~ -60V DC) |
| Power Consumption | 120 watts (full load) | 96 watts (full load) |
| Environment | Operating Temperature: 0 ~ 50 degrees C Humidity: 5% ~ 90% RH (non-condensing) | |
| Converter Modules | PLANET FST-80x, GST-80x series (Page 11) | |
| Management | SNMP v1/v2C, Web, CLI, SSH | |
| Management Ports | 1 x RS232 Console 1 x 10/100BASE-TX RJ45; Auto-MDI, Auto-Negotiation | |
| Features | System Temperature Threshold Protection, Slot Redundancy, Hot-swappable dual power system, SNMP trap | |
| Emission | CE, FCC class A | |

Hot-Swappable / Flexible Power Input

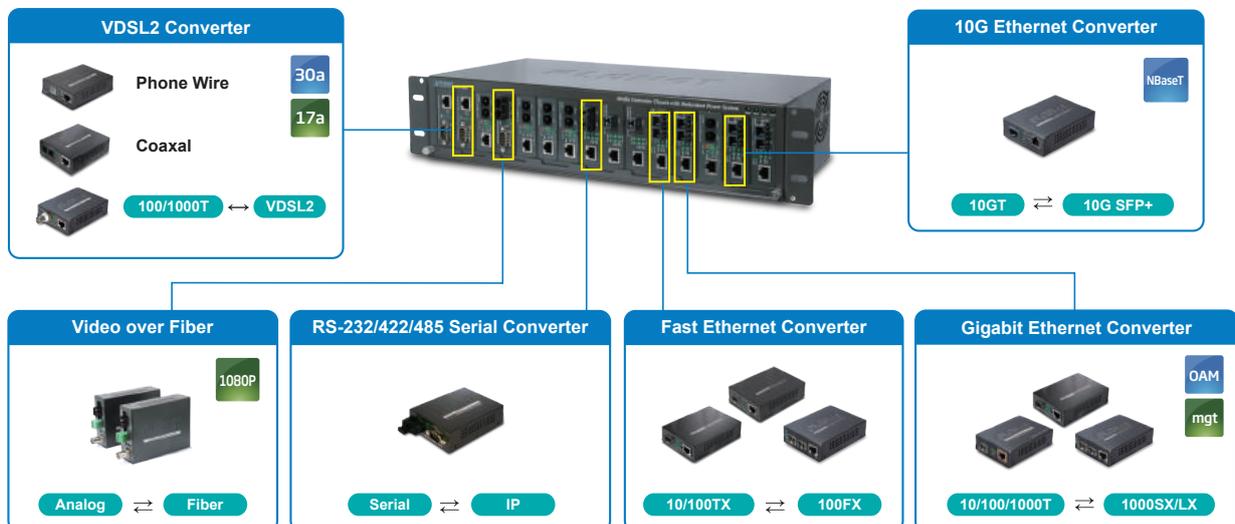

Power Module

Standard Media Converter Chassis

The MC-1500 series provides 15 slots for PLANET's full-ranging media converters, including Fast Ethernet, Gigabit Ethernet or VDSL2 Converters. The 15 slots in the 19" rack-mountable housing help to save more spaces for Fiber-Optic wiring, simplify the structure and ease the maintenance of media conversion. With an independent power supply on each slot of the MC-1500 series, any converter is hot-swappable without causing an interruption to other converters. Each bay of the media converter chassis can be populated with any of PLANET's media converter series, the FT, GT, VC-20x and ICS, to provide media conversion between fiber optic, phone wire, serial and copper lines, offering high flexibility in installation and cost-effective scalable solution.

| Model | VF-101G-KIT | VF-102G-KIT | VF-106G-KIT | VF-402-KIT |
| Product Image |  |  |  |  |
| Ports | 1 x Fiber, 1 x BNC (75ohm / unbalanced interface) | | | 1 x Fiber, 4 x BNC (75ohm / unbalanced interface) |
| Optic Interface | ST | FC | WDM-SC | FC |
| Wavelength | T model: TX 1310nm RX 1550nm R model: TX 1550nm RX 1310nm | | | |
| Max Distance | 20km for single mode | | | |
| Video Type | 1080p: AHD/TVI/CVI 480p: CVBS | | | |
| Dimensions (W x D x H) | 94 x 70 x 26 mm | | 157 x 116.5 x 48 mm | |
| Power / Power Consumption | 5V DC, 2A max./4.8 watts max. | | 5V DC, 2A max./4.8 watts max. | |
| Environment | Operating Temperature: -25 ~ 70 degrees C, Humidity: 0 ~ 95% RH (non-condensing) | | | |
| Video Type | 1080p: AHD/TVI/CVI | | 480p: CVBS | |
| Video Specifications | 1 bi-directional channel; NTSC/PAL system compliant; 6.5MHz video bandwidth; SNR Weighted @63db (typical) | | 4 bi-directional channel; NTSC/PAL system compliant; 6.5MHz video bandwidth; SNR Weighted @63db (typical) | |
| Data Interface Specifications | 1 simplex channel RS485: 115.2kbps data rate max.; Bit Error Rate @10ns | | | |
| Applied Chassis | MC-700 / MC-1500 / MC-1500R / MC-1500R48 | | | - |

| Serial over Fast Ethernet Media Converters | | |
|--|---|---|
| Model | ICS-100 | ICS-105A |
| Product Image |  |  |
| Ports | 1 x 10/100BASE-TX 1 x DB9 | 1 x 100BASE-FX 1 x DB9 |
| Optic Interface | - | SFP |
| Wavelength | - | Vary on SFP Module |
| Max Distance | 100m UTP | 550m ~ 120km Vary on SFP Module |
| Serial Interface | 3-in-1 DB9, RS232, RS422 and RS485 (2/4-wire)110 to 921Kbps | |
| Dimensions | 94 x 70 x 26 mm | |
| Power | 5V DC, 2A max. | |
| Power Consumption | 5.5 watts | |
| Environment | Operating Temperature: 0 ~ 50 degrees C Humidity: 5% ~ 90% RH (non-condensing) | |
| Features | Web Management, VCOM utility, PLANET Smart Discovery Multiple operating modes | |
| Applied Chassis | MC-700 / MC-1500 / MC-1500R / MC-1500R48 | |

Passive Optical Network - GEAPON

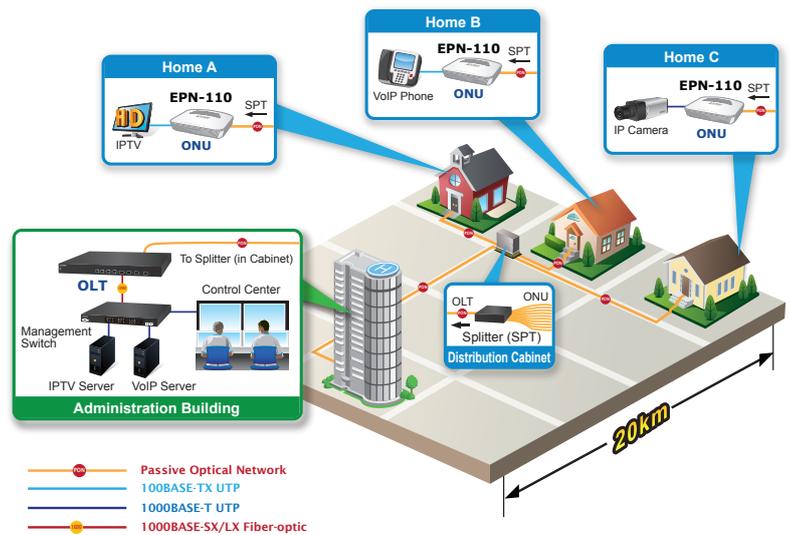

Passive Optical Network (PON) would be the most promising Next Generation Network technology to meet the high bandwidth demand for HDTV, IPTV, VoIP and multimedia broadband applications. PON technology is developed to support PMP (Point-to-Multi-Point) applications and offers the advantages of reduced cost by sharing the equipment and fiber at the CO, and easy maintenance compared to the active equipment.

PLANET offers the perfect GEAPON OLT and ONU solutions bringing the FTTH applications with high scalability yet cost-effective network connection. The competitive advantages of PLANET GEAPON OLT and ONU solutions include:

- High split ratio of 1:64
- Up to 20km distance between equipment nodes
- Centralized management with user-friendly GUI utility
- Easy installation and maintenance
- Lower operating costs from the reduction of "active" components

Fiber To The Home (FTTH) Application
