Chapter 3

Operation

Overview

The 3-Port True 4K HDMI Switch offers easy and flexible source device selection with either the front panel pushbuttons, and remote control.

Note:

- ◆ Whenever the VS381B is powered on and there is no video input source connected, it automatically selects Port 1 as the active port (i.e., the Port 1 LED lights up). You may choose one of the methods outlined below to select a different port as your active port.
 - ◆ The VS381B takes about 10-20 seconds to boot up and apply system configuration settings when first powered on.
-

Manual Port Selection

To select an HDMI source device, press the Port Selection Pushbutton on the front panel to cycle through the HDMI sources connected to HDMI Input Port 1, 2, and 3.

Note: The Port LED (green) light indicates which port is currently selected.

Remote Control Selection

To select a source device with the remote control, press the number button that corresponds to the port the HDMI device is connected to. The corresponding Port LED lights up.

See *IR Remote Control*, page 7 for more details.

Alternatively, you may also cycle through the available source devices by pushing the Port Up and Port Down buttons on the IR remote control.

- ◆ Use the Port Up button to select the next available port in ascending order (from HDMI Input Port 1 to HDMI Input Port 3).
- ◆ Use the Port Down button to select the next available port in descending order (from HDMI Input Port 3 to HDMI Input Port 1).

Note: Aim the remote control at the IR receiver located on the front panel of the VS381B. For optimum performance, make sure there is a clear line-of-sight between the remote control unit and the IR receiver.

Auto Input Switching

The VS381B supports auto input switching, each time when the HDMI input source is plugged or unplugged, the VS381B prioritizes and outputs an HDMI input source to the connected HDMI-enabled monitor accordingly.

Adding an HDMI source

The VS381B prioritizes and outputs the latest detected HDMI input source transmission to the connected HDMI-enabled monitor.

Removing an HDMI Source

The VS381B automatically switches and outputs to the next available HDMI input source transmission to the connected HDMI-enabled monitor. The rotation sequence is HDMI Input Port 1 to HDMI Input Port 2 to HDMI Input Port 3 to HDMI Input Port 1.

The rotation sequence cycles through HDMI Input Port 1 to HDMI Input Port 3.

For example, HDMI input source connected to HDMI Input Port 1 will be displayed when the HDMI input source connected to HDMI Input Port 3 is removed.

Powering Off and Restarting

If you power off the VS381B, follows these steps before powering it on again:

1. Power off the attached devices.
2. Unplug the power adapter cable from the VS381B.
3. Wait 10 seconds, and then plug the power adapter cable back in.
