

Connect. Relax. Live.

## Video Products *We See Your Needs*

**VanCryst™**

***Our Vision. Your Advantage.***

The VanCryst™ range of applied video solutions gives you crystal clear images from all vantage points – at home, in the office, and in the commercial, industrial, information, and entertainment fields. From switches and splitters to extenders and converters, the VanCryst™ range of video products provide you with a multitude of flexible, integrated solutions for all video-related applications. Incorporating all current video interfaces and matchless audio support, VanCryst™ products allow you to seamlessly transition to the highest resolutions. There is a VanCryst™ product to meet all your applied video needs.

# ATEN's Complete Range of Video Solutions

## Video Switch Series

ATEN video switches allow you to conveniently display the video output of 2 to 16 separate computer systems or high resolution video sources on a single monitor.

## Video Matrix Switch Series

ATEN Video Matrix switches are ideal for presentations and applications where video and audio from multiple computers is being delivered to multiple destinations.

## Video Splitter Series

ATEN video splitters duplicate the video signal from a single video source to up to 16 outputs. This video signal can be cascaded to accommodate numerous displays in a multitude of locations.

## Video Enhancement Series

ATEN video extenders, boosters, and repeaters can increase the distance between computer systems/video source devices and high resolution display monitors to up to 150 m.

## Video Synchronizer

The ATEN Video Synchronizer is designed to compensate for video signal delays over large distances. It is compatible with ATEN KVM Extenders and Video Extenders.

## DVI Video Converter

ATEN DVI video converters connect VGA-based video devices to DVI digital display devices. The high video resolutions and easy-to-use features make this series a winning solution.

## Integrated Applications

ATEN video product lines are designed to work together seamlessly, giving you the flexibility to integrate switches, splitters, extenders, repeaters and synchronizers in your installation. No matter whether in meeting rooms, classrooms, computer stores, and information control centers, or even at home, the compatibility of ATEN video product lines provides you with a multitude of flexible, integrated solutions to best suit your environment.

## Display a Single Video Source on Thousands of Video Display Devices

ATEN video splitters allow you to add additional video splitters to increase the capacity of video outputs. By using the video output ports of a parent video splitter to connect to the video input port of the child video splitter, you can display one video source on multiple display devices.

## Control Color Phase and Correct Timing Errors

The line synchronizing function of the ATEN Video Synchronizer corrects color phase and timing errors that occur over long-distance transmissions. It also enables you to manually tune the R/G/B signal settings, store the settings and retrieve them later using the memory button. It is ideal for integrated applications in a video extender/repeater installation.

# ATEN HDMI Solutions Integrate Your Visions

Whether at work or play, the ATEN HDMI product line gives you the flexibility to incorporate switches, splitters, and extenders in your HDMI installation, allowing you to integrate your vision at home, in meeting rooms, classrooms, computer stores, theaters – anywhere you need digital video and audio of the highest quality.

- **The Ultimate in High Definition Home Theater**

Connect multiple HDMI devices (such as an HD camcorder or satellite box, HD-DVD player, hi-def Blu-ray player, home theater PC, stand-alone streaming media player, or gaming console) to your HDMI monitor, display, projector or TV at the same time.

- **Customize Your HDMI Control**

To provide more application capabilities, the ATEN HDMI Switch features a serial port for high-end system control. With this serial port, you can design your own automatic software to control your system, or integrate the system into your current customized installation.

- **Duplicate Your HDMI Source to a Multitude of Locations**

At demo sites, computer stores, exhibitions, or theaters, you can display an A/V HDMI source on multiple HDTVs at the same time, to compare video quality among multiple displays, for example.

- **Duplicate Several HDMI Sources to Different Displays**

ATEN's solution is ideal for stock exchanges, banks, or any kind of information board installation where duplicating a variety of A/V information to many displays is necessary and controllers need to be able to monitor the different HDMI outputs at the same time.

Not all products support these features. Please see the comparison chart on page 48 for details.

# Video Splitters (Wall Mountable)

## VS132 2-Port Video Splitter

- One video input to 2 video outputs
- Supports up to 350 MHz bandwidth
- Cascadable to 3 levels – provides up to 8 video signals
- Long-distance transmission – up to 65 m
- Superior video quality – 1920 x 1440
- DDC, DDC2, DDC2B Compatible (Port 1 only)
- Supports VGA, XGA, SVGA, UXGA and multisync monitors
- Compact design with convenient topside connection, lays flat on a desktop or mounts on the wall

## VS102 2-Port Video Splitter

- One video input to 2 video outputs
- Supports up to 250 MHz bandwidth
- Cascadable to 3 levels – provides up to 8 video signals
- Long-distance transmission – up to 65 m
- Superior video quality – up to 1920 x 1440
- DDC, DDC2, DDC2B Compatible (Port 1 only)
- Supports VGA, XGA, SVGA, UXGA and multisync monitors
- Compact design with convenient topside connection, lays flat on a desktop or mounts on the wall

## VS82 / VS84 / VS88 2/4/8-Port Video Splitter

- One video input to 2/4/8 video outputs
- Supports up to 250 MHz bandwidth
- Cascadable to 3 levels – provides up to 8/64/512 video signals
- Long-distance transmission – up to 65 m
- Superior video quality – up to 1920 x 1440
- DDC, DDC2, DDC2B Compatible (Port 1 only)
- Supports VGA, XGA, SVGA, UXGA and multisync monitors
- Compact design with convenient topside connection, lays flat on a desktop or mounts on the wall

### VS162 / VS164 2/4-Port DVI Video Splitter

- Connects computers with DVI graphics to multiple DVI compatible monitors or projectors
- Fully compliant with DVI-Digital and DVI-Analog
- Supports DDWG (Digital Display Working Group) standard for DVI compliant monitors
- Cascadable to 3 levels – provides up to 8/ 64 video signals
- Audio-enabled
- Superior video quality – up to 1920 x 1200
- DDC, DDC2, DDC2B compatible (Port 1 only)

# Video Switches

ATEN video switches allow you to conveniently display the video output of 2 to 16 computer systems or high-resolution video sources on a single monitor. All models grant users the convenience of instantly accessing signals from various sources without having to reach behind the screen. With various models supporting the full range of video standards, the ATEN series is not only ideal for presentations, but also for home theater applications.

- **Easy Switching**

Fast and convenient video source selection via front panel pushbuttons or IR remote control.

- **External IR Receiver**

External IR receiver (1.8 m) allows the switch to be located close to the projector or monitor to keep the cables shorter and preserve optimum resolution, while the operator uses the remote control unit to select the audio/video source.

- **Audio Enabled**

No need for a separate set of speakers for each source.

- **Applications**

Ideal for meeting rooms, laboratories, research centers, information management centers and home theater applications.

Not all products support these features. Please see the comparison chart on page 54 for details.

# Video Switches

## VS291 / VS491 2/4-Port Video Switch

- Displays the video output of two (VS291) or four (VS491) computers on a single monitor or projector
- Quick and easy switching via front panel pushbutton
- Long-distance transmission – up to 10 m
- Superior video quality – up to 1920 x 1440; DDC; DDC2; DDC2B
- Supports VGA, XGA, SVGA, UXGA and multisync monitors

## VS881 8-Port Video Switch

Ideal for Meeting Rooms

- Displays the video output of eight computers on a single monitor or projector
- Stylish concentric design with logical connector layout for quick and easy access
- Quick and easy switching via front panel pushbuttons or IR remote control
- External IR receiver (1.8 m) for maximum efficiency and convenience
- Extra-thin IR handset allows easy storage in the mother unit
- Long-distance transmission – up to 10 m
- Superior video quality – up to 2048 x 1536; DDC; DDC2; DDC2B
- Supports VGA, XGA, SVGA, UXGA, QXGA and multisync monitors

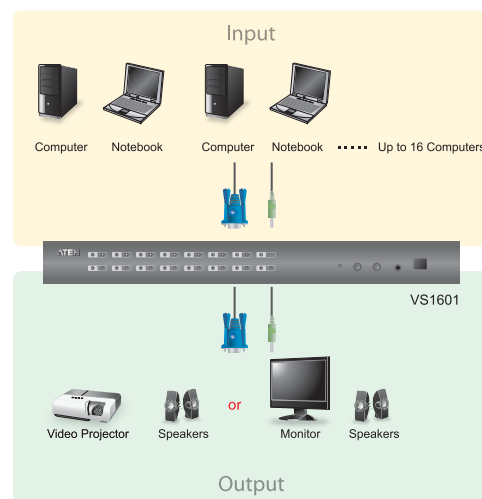

## VS1601 16-Port Video Switch + Audio

- Displays the video output of sixteen computers on a single monitor or projector
- Quick and easy switching via front panel pushbuttons or IR remote control
- External IR receiver (1.8 m) for maximum efficiency and convenience
- Audio-enabled
- Supports up to 250 MHz bandwidth
- Long-distance transmission – up to 65 m
- Superior video quality – up to 1920 x 1440 @ 60Hz; DDC; DDC2; DDC2B
- Supports VGA, SVGA, XGA and multisync monitors
- Designed for enterprise use – 1U in size and rack mountable

## Setup (VS1601)

## Accessories

1. VGA/Audio Cable: 1.8 m x 1 (VS1601)
2. VGA Cable: 1.2 m x 1 (VS881)
3. IR Remote Control Unit x 1 (VS881)
4. IR Remote Control Unit x 1 (VS1601)
5. Infrared Receiver x 1 (VS881, VS1601)
6. Power Adapter: AC9V x 1 (VS881, VS1601); DC9V x 1 (VS291/VS491)

# Video Switches

## VS261 / VS461 2/4-Port **DVI** Video Switch

- Displays the video output of two or four digital devices (e.g., DVD player, computer) on a single DVI display device
- Fully compliant with DVI-Digital and DVI-Analog
- Audio-enabled
- Quick and easy switching via front panel pushbuttons or IR remote control
- Superior video quality – up to 1920 x 1200
- DDC, DDC2, DDC2B compatible
- Stackable design
- Supports PCs and Macs

## VS231 / VS431 2/4-Port **HDTV A/V** Switch

- Displays the video output of two or four digital devices on a single high definition monitor or projector
- Audio-enabled
- Quick and easy switching via front panel pushbuttons or IR remote control
- Electronic switching for greater reliability and durability
- Superior video quality – up to 1600 x 1200
- Complete home theater switching solution

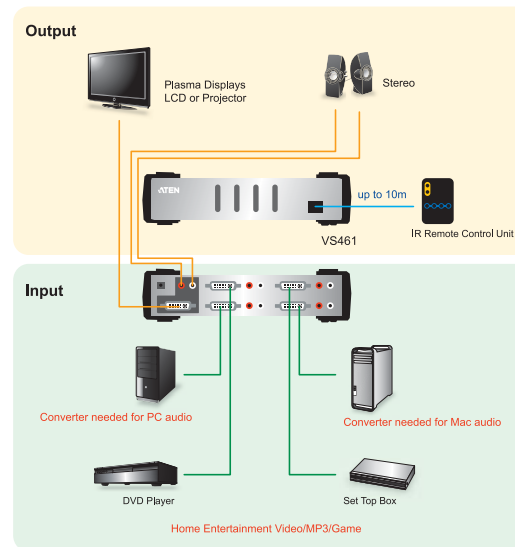

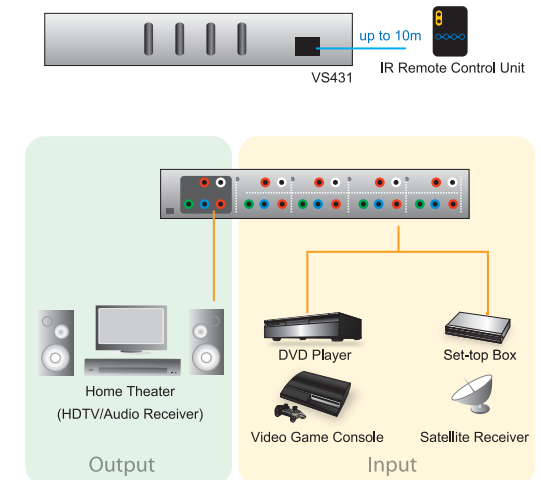

### VS201 2-Port Video Switch

- Displays the video output of two computers on a single monitor or projector
- Automatic Incoming signal selection (Auto)
- Quick and easy switching via slide switch
- Long-distance transmission – up to 65 m
- Superior video quality – up to 1920 x 1440; DDC; DDC2; DDC2B
- Supports VGA, XGA, SVGA, UXGA and multisync monitors

### Setup (VS461)

### Setup (VS431)

### Accessories

- 1 IR Remote Control Unit x 1 (VS261/VS461, VS231/VS431)
2. Power Adapters: DC5.3V x 1 (VS261/VS461, VS231/VS431); AC9V x 1 (VS201)

### Optional Equipment

# Video Splitters

A video splitter not only duplicates the video/audio signal from a single source to multiple outputs, but also boosts the signal so it can be conveyed over long distances before unacceptable degradation occurs. Since the signal is boosted, video loss is kept at a minimum and multiple splitters can be cascaded to accommodate even more output displays.

- **Expandable**

Cascadable to 3 levels – provides up to 8/64/512 and thousands of video signals.

- **Audio Enabled**

The audio signal from a single source is duplicated to multiple outputs.

- **Long Signal Range**

Long-distance transmission – up to 65 m.

- **Applications**

Ideal for public broadcasting, computer stores, classrooms and training facilities.

*Not all products support these features. Please see the comparison chart on page 60 for details.*

# Video Splitters

**VanCryst™**  
**VS132A/ VS134A/VS138A**  
**2/4/8-Port Video Splitter**

- One video input to 2/4/8 video outputs
- Supports up to 450 MHz bandwidth
- Cascadable to 3 levels – provides up to 8/64/512 video signals
- Long distance transmission – up to 65m
- Superior video quality – up to 2048 x 1536
- Supports VGA, XGA, SVGA, UXGA, QXGA and multi-sync monitors
- Built-in 1.5 GHz amplifier to ensure video system maintain excellent fidelity
- All-metal casing

**VS92A / VS94A / VS98A**  
**2/4/8-Port Video Splitter**

- One video input to 2/4/8 video outputs
- Cascadable to 3 levels – provides up to 8/64/512 video signals
- Supports up to 350 MHz bandwidth
- Long-distance transmission – up to 65 m
- Superior video quality – 1920 x 1440
- DDC, DDC2, DDC2B Compatible (Port 1 only)
- Supports VGA, XGA, SVGA, UXGA and multisync monitors
- All metal casing

### VS0116 16-Port Video Splitter + Audio

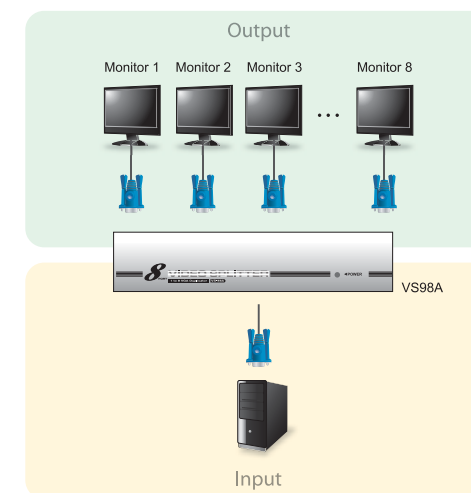

- One video input to 16 video outputs
- Supports up to 250 MHz bandwidth
- Cascadable to 3 levels – provides up to thousands of video signals
- Long-distance transmission – up to 65 m
- Audio-enabled
- Superior video quality – up to 1920 x 1440
- Supports VGA, XGA, SVGA, UXGA and multisync monitors
- DDC, DDC2, DDC2B compatible (Port 1 only)
- Designed for enterprise use – 1U in size and rack mountable

### Setup (VS0116)

### Setup (VS98A)

1. VGA/Audio Cable: 1.8 m x 1 (VS0116)
2. Power Adapters: DC9V x 1 (VS92A/VS94A/VS98A)  
DC5V x 1 (VS132A/VS134A/VS138A)  
DC5.3V x 1 (VS0116)

# Video Splitters (Wall Mountable)

## VS132 2-Port Video Splitter

- One video input to 2 video outputs
- Supports up to 350 MHz bandwidth
- Cascadable to 3 levels – provides up to 8 video signals
- Long-distance transmission – up to 65 m
- Superior video quality – 1920 x 1440
- DDC, DDC2, DDC2B Compatible (Port 1 only)
- Supports VGA, XGA, SVGA, UXGA and multisync monitors
- Compact design with convenient topside connection, lays flat on a desktop or mounts on the wall

## VS102 2-Port Video Splitter

- One video input to 2 video outputs
- Supports up to 250 MHz bandwidth
- Cascadable to 3 levels – provides up to 8 video signals
- Long-distance transmission – up to 65 m
- Superior video quality – up to 1920 x 1440
- DDC, DDC2, DDC2B Compatible (Port 1 only)
- Supports VGA, XGA, SVGA, UXGA and multisync monitors
- Compact design with convenient topside connection, lays flat on a desktop or mounts on the wall

## VS82 / VS84 / VS88 2/4/8-Port Video Splitter

- One video input to 2/4/8 video outputs
- Supports up to 250 MHz bandwidth
- Cascadable to 3 levels – provides up to 8/64/512 video signals
- Long-distance transmission – up to 65 m
- Superior video quality – up to 1920 x 1440
- DDC, DDC2, DDC2B Compatible (Port 1 only)
- Supports VGA, XGA, SVGA, UXGA and multisync monitors
- Compact design with convenient topside connection, lays flat on a desktop or mounts on the wall

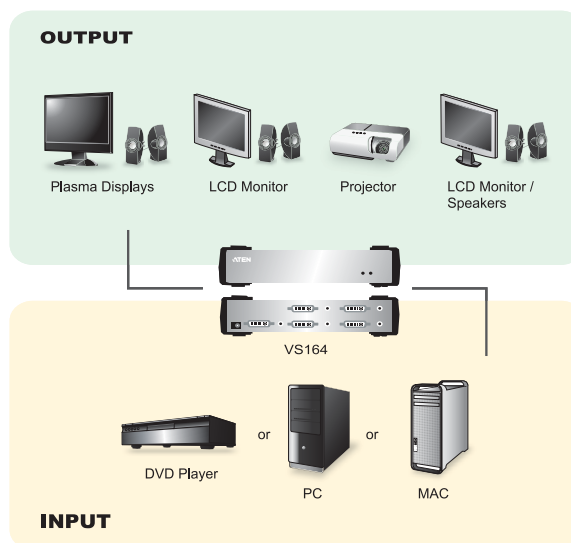

### VS162 / VS164 2/4-Port DVI Video Splitter

- Connects computers with DVI graphics to multiple DVI compatible monitors or projectors
- Fully compliant with DVI-Digital and DVI-Analog
- Supports DDWG (Digital Display Working Group) standard for DVI compliant monitors
- Cascadable to 3 levels – provides up to 8/ 64 video signals
- Audio-enabled
- Superior video quality – up to 1920 x 1200
- DDC, DDC2, DDC2B compatible (Port 1 only)

# Video Matrix Switches

ATEN Video Matrix Switches route video/audio signals from multiple sources to multiple destinations, such as screens and projectors. Video Matrix Switches also act as distribution amplifiers, boosting the signal output and thereby allowing you to extend the operating distance up to 65 meters while maintaining excellent video quality. Further increasing the number of outputs is also supported by cascading the Video Matrix Switches with a regular video splitter.

- **Easy Switching**

Front panel pushbuttons select the combination of video input to video output.

- **Long Signal Range**

Duplicates and enhances video signals up to 65 m (max.).

- **Expandable**

Cascade to ATEN video splitters to support hundreds of video displays.

- **Applications**

Ideal for presentations and applications where information from multiple computers is being delivered to multiple displays, such as Information Control Centers or Customer Service Centers.

# Video Matrix Switches

**VS0202**  
**Video Matrix Switch + Audio**  
2 Inputs, 2 Outputs, Flexible Display

- Each of the 2 video outs can toggle between Source 1 and Source 2 using front panel pushbuttons
- Expandable – Cascade to ATEN's video splitters to support hundreds of video displays
- Audio-enabled
- With up to 300 MHz Video Bandwidth
- Duplicate and enhance video signals up to 65 m
- Superior video quality – up to 1920 x 1440

**VS0204**  
**Video Matrix Switch + Audio**  
2 Inputs, 4 Outputs, Flexible Display

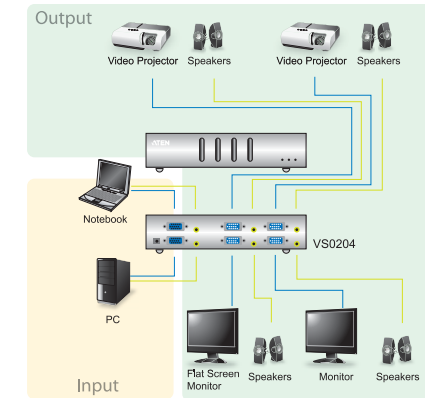

- Each of the 4 video outs can toggle between Source 1 and Source 2 using front panel pushbuttons
- Expandable – Cascade to ATEN's video splitters to support hundreds of video displays
- Audio-enabled
- With up to 300 MHz Video Bandwidth
- Duplicate and enhance video signals up to 65 m
- Superior video quality – up to 1920 x 1440

**VS0404**  
**Video Matrix Switch + Audio**  
4 Inputs, 4 Outputs, Flexible Display

- Each of the 4 video outs can toggle between Source 1 and Source 4 using front panel pushbuttons
- Expandable – Cascade to ATEN's video splitters to support hundreds of video displays
- Audio-enabled
- With up to 300 MHz Video Bandwidth
- Duplicate and enhance video signals up to 65 m
- Superior video quality – up to 1920 x 1440

## Setup (VS0204)

## Accessories

1. VGA/Audio Cable: 1.8 m x 1 (VS0202/VS0204/VS0404)
2. Power Adapter: DC5.3V x 1 (VS0202/VS0204/VS0404)

# Video Extenders

ATEN provides various Video Extender models to support either VGA (Analog) or DVI (Digital) video signals. Video Extenders allow you to extend the distance between computer systems and display devices up to 150 m. Video Extenders are ideal for applications where remote video displays are required, such as placing computers in a secure location or where they are protected from harsh environmental conditions, or simply when the display device needs to be at a distance from the source device.

ATEN also offers the Video Repeater, a video signal extension device that is compatible with ATEN KVM Extenders and Video Extenders. It extends video transmission range to up to twice the original distance over Cat 5e cables. Furthermore, in some long distance installations where video signals may degrade, the VE550 can be used in conjunction with the VE510 Video Synchronizer to compensate for video signal delay and video color bleeding.

- **Audio Enabled**

Many models extend the audio signal over long distances in addition to the video signal.

- **VGA and DVI compatible**

ATEN offers either VGA (Analog) or DVI (Digital) video interfaces to meet your expanding needs.

- **Long Distance Transition**

Requires only one Cat 5e cable to extend the video/audio signal up to 150 m.

- **Dual Display**

Supports a local and a remote display.

- **Video Gain Control**

Compensation switch is provided to adjust video gain control to compensate for distance.

Not all products support these features. Please see the comparison chart on page 67 for details.

# Video Extenders

NEW

**VE200**  
**Audio/Video Extender**  
Dual Audio/Video Output

- Uses Cat 5e cable to connect the local and remote units
- Supports one local and two remote displays
- Transmission distance up to 150 m\*
- Multiplatform support – Windows, Mac, and Linux
- Superior video quality – up to 1920 x 1200 @ 60 Hz at 50m, 1600 x 1200@60 Hz at 150m, 1280 x 1024 @ 60 Hz at 200m
- Two gain control modes for sharpest video
- IR remote control for screen on/off at remote site
- Provides two RS-232 channels for selection
- Follows VESA FDMI mount standard
- Supports VGA, SVGA, XGA, SXGA, UXGA and multisync monitors – Local monitor supports DDC

\* When combined in an installation with ATEN's VB552 (VGA Over Cat5 Repeater + Audio) can extend distance up to 450 m

**VE150**  
**Video Extender**

- Uses Cat 5e cable to connect the local and remote units
- Supports one local and one remote displays
- Transmission distance up to 150 m
- Easy installation
- 16-position adjustable video gain control to compensate for distance
- Superior video quality – up to 1280 x 1024
- Supports VGA, SVGA, XGA, SXGA and multisync monitors – Local monitor supports DDC

**VE120**  
**Video Extender**

- Uses Cat 5e cable to connect the local and remote units
- Supports one local and one remote displays
- Transmission distance up to 130 m
- Easy installation
- Picture compensation improves video quality over long distances
- Superior video quality – up to 1024 x 768
- Supports VGA, SVGA, XGA, SXGA and multisync monitors – Local monitor supports DDC

# Video Synchronizer & Converter

## VE510 Video Synchronizer

Synchronize Video Signals for Perfect Pictures

- Connects VGA-based video devices to VGA displays and enhances the video quality in long distance installations
- Compensates for a delay and synchronizes signal delays
- RGB delay tuner – manually synchronizes the RGB signals via pushbuttons
- Skew equalization
- Memory set button – allows storing and recalling of user settings
- LED display for status monitoring
- Easy installation
- Hot pluggable
- Compact Size – Din Rail and Wall mountable
- Compatible with ATEN KVM Extenders, Video Extenders and KVM Switches

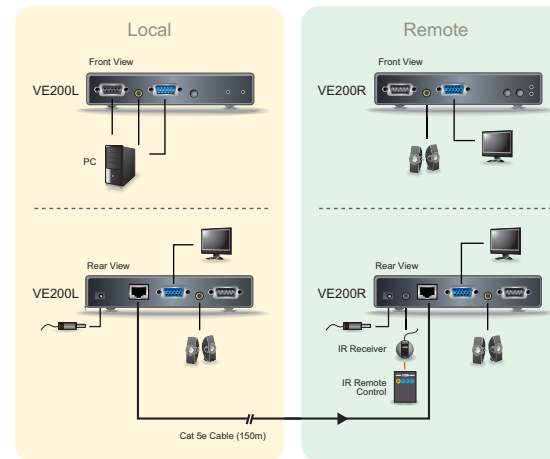

## VC160 VGA to DVI Converter

- 1 VGA input, 1 DVI-D output
- Connects VGA-based video devices to DVI digital monitors or DVI-equipped projectors
- Superior video quality – up to 1600 x 1200
- Memory set button – allows storing and selecting user settings
- Easy installation

## Setup (VE200)

## Accessories

1. VGA Cable: 1.8 m x 1 (VE120, VE150, VE510, VC160)
2. VGA/Audio Cable: 1.8 m x 1 (VE200)
3. Power Transfer Cable x 1 (VE510)
4. IR Remote Control Unit x 1 (VE200)
5. Infrared Receiver x 1 (VE200)
6. Mounting Kit x 1 (VE510, VC160)
7. Grounding Wire x 1 (VE510)
8. Power Adapters: AC9V x 2 (VE120); DC5.3V x 2 (VE150, VE200); DC5.3V x 1 (VC160)

## Optional Equipment

Type	Part No. / Spec.	Compatible Product
Video Synchronizer	VE510	VE120, VE150 ( p.64 )

# Media Distribution Solution

## Complete Video Over Cat 5 + Audio Solution

### Audio/Video Over Cat 5+Serial

Distribute high quality audio/video content to multiple displays in real time

ATEN's complete Video Over Cat 5 + Audio solution is the quickest and most efficient way to move multimedia content from input source to multiple displays.

A one-to-many, point-to-multipoint system for transmission of high quality video and audio, the complete Video Over Cat 5 + Audio solution transmits rich multimedia content in real time from any type of player/computer to multiple display devices over Cat 5e cable. Cascadable to three levels, the complete Video Over Cat 5 + Audio solution can support thousands of displays. The solution also provides screen controls at the remote site and RS-232 connectivity so devices such as touchscreens and barcode scanners can be included in the installation.

The complete Video Over Cat 5 + Audio solution provides the flexibility you need for a customized digital signage or video display installation, allowing you to set up your display device up to 450 m (1500 ft) from the source device. Displays can be mounted strategically in public view, while the hardware needed to run the multimedia content is kept behind closed doors and out of public reach.

The complete Video Over Cat 5 + Audio solution is ideal for any installation that requires multimedia content to be delivered to multiple destinations, such as:

- In-store and tradeshow digital signage
- Broadcasting information to public locations (news, airline and train schedules, etc.
- Movie theaters, customer service centers
- Traffic, information control centers
- Sporting events, gyms, bowling alleys
- Trading floors, banks
- Classrooms, lecture theater overflow rooms
- Meeting rooms, seminars, company training facilities

**VS1504 / VS1508**  
4/8-Port Cat 5 Audio/ Video Splitter

- One video input to 4/8 video outputs
- Cascadable to three levels – provides up to thousands of video signals when combined in an installation with ATEN repeaters\*
- Audio and serial enabled
- Uses Cat 5e (or higher) cable to extend displays up to 150 m
- Superior video quality – supports 1920 x 1200 @ 60 Hz at 30m, 1600 x 1200@60 Hz at 150m, 1280 x 1024 @ 60 Hz at 200m
- Two gain control modes for sharpest picture quality – adjustable by OSD
- Group screens off/on function
- Provides two RS-232 channels for selection
- Follows VESA FDMI mount standard

\* When combined in an installation with ATEN's VB552 (VGA Over Cat5 Repeater + Audio) can extend displays up to 450 m

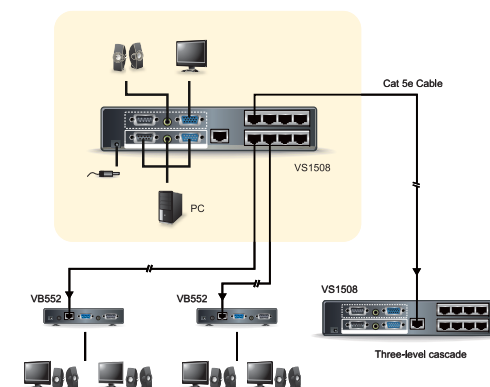

**VB552**  
VGA Over Cat 5 Repeater + Audio  
Dual Audio/Video Output

- Uses Cat 5e cable to extend audio/video signal
- Extends the transmission range an extra 150m
- Superior video quality – supports 1920 x 1200 @ 60 Hz at 30m, 1600 x 1200@60 Hz at 150m, 1280 x 1024 @ 60 Hz at 200m
- Audio and serial enabled
- Two gain control modes for sharpest picture quality
- Video gain and compensation adjustable via OSD
- IR receiver for quick and easy video quality adjustment
- IR remote control for screen on/off and video adjustment at remote site
- Provides two RS-232 channels for selection
- Follows VESA FDMI mount standard
- Supports VGA, SVGA, XGA, SXGA, UXGA and multisync monitors – Local monitor supports DDC

## Setup

## Accessories

1. VGA/Audio Cable: 1.8 m x 1 (VS1504/VS1508, VB552)
2. Power Adapter: DC5.3V x 1 (VS1504/VS1508, VB552)
3. IR Remote Control Unit x 1 (VB552)

## Optional Equipment

Type	Part No. / Spec.	Page No.	Compatible Product
VGA Over Cat 5 Repeater	VB552	P66	VS1504/VS1508
Audio/Video Extender	VE200	P64	VS1504/VS1508, VB552
Video Splitter via Cat 5 with Audio	VS1504/VS1508	P66	VB552
