US7220 Thunderbolt switch

Create a stunning 4K workspace with two displays, two computers and enough peripherals to cover all your needs. The Thunderbolt 2, USB3.0, eSATA and audio connections guarantee high data speed. Leave a workstation neat and intact when travelling, simply re-plug your laptop to the switch and everything is again connected.

MULTIVIEW WORKSTATION

Equipped with one HDMI and one Thunderbolt output port, US7220 equips your desktop with 2 screens. Switch between 2 dual view computers or simply add 2 extra screens to your laptop for a wide workspace.

EXTREME DATA SPEED

Thunderbolt 2.0 combined with USB3.0 handle high data transfers. Both cover data storage and imports within seconds.

Thunderbolt 2: 20Gb/s

USB 3.0: 5Gb/s

PERIPHERALS

Connect up to 11 peripherals, for music, drawing, video, storage or other tools. Extra Thunderbolt devices, connected to a Thunderbolt screen, can be accessed by both computers.

- Single or dual view
- 2x USB2.0, 3x USB3.0
- 1x eSATA, 1x Ethernet
- Up to 3840x2160@60Hz
- 2x Thunderbolt2.0 input
- Expandable via daisy-chain
- 1x Thunderbolt2.0 output, 1x HDMI output
