WDAP-W1200E

Screw x 2

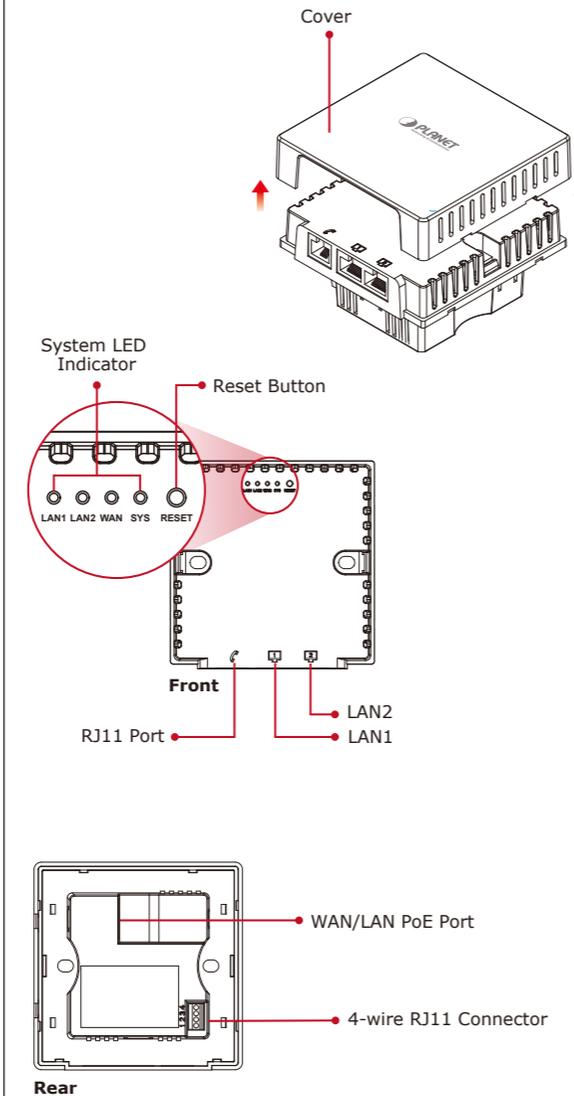

Quick Guide

If there is any item missing or damaged, please contact the seller immediately.

2. Physical Introduction

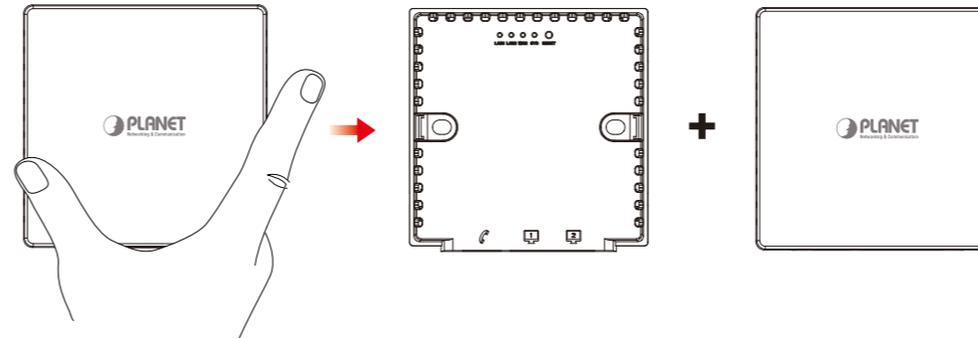

Hardware Description

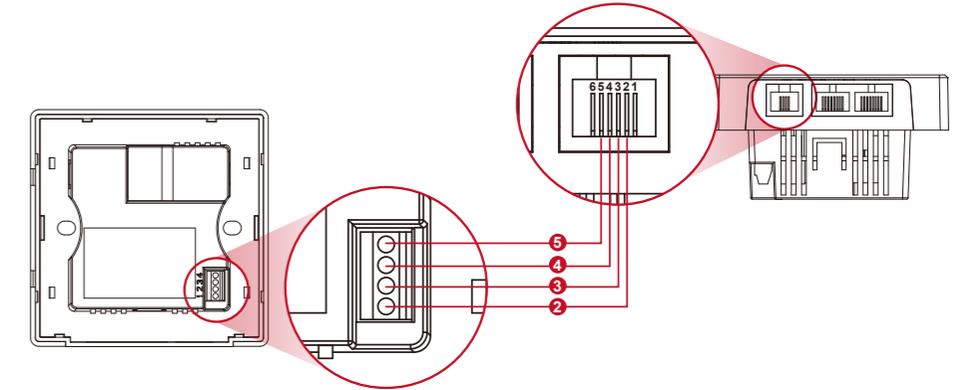

3. Hardware Installation

Step 1: Follow the figures below to install the WDAP-W1200E.

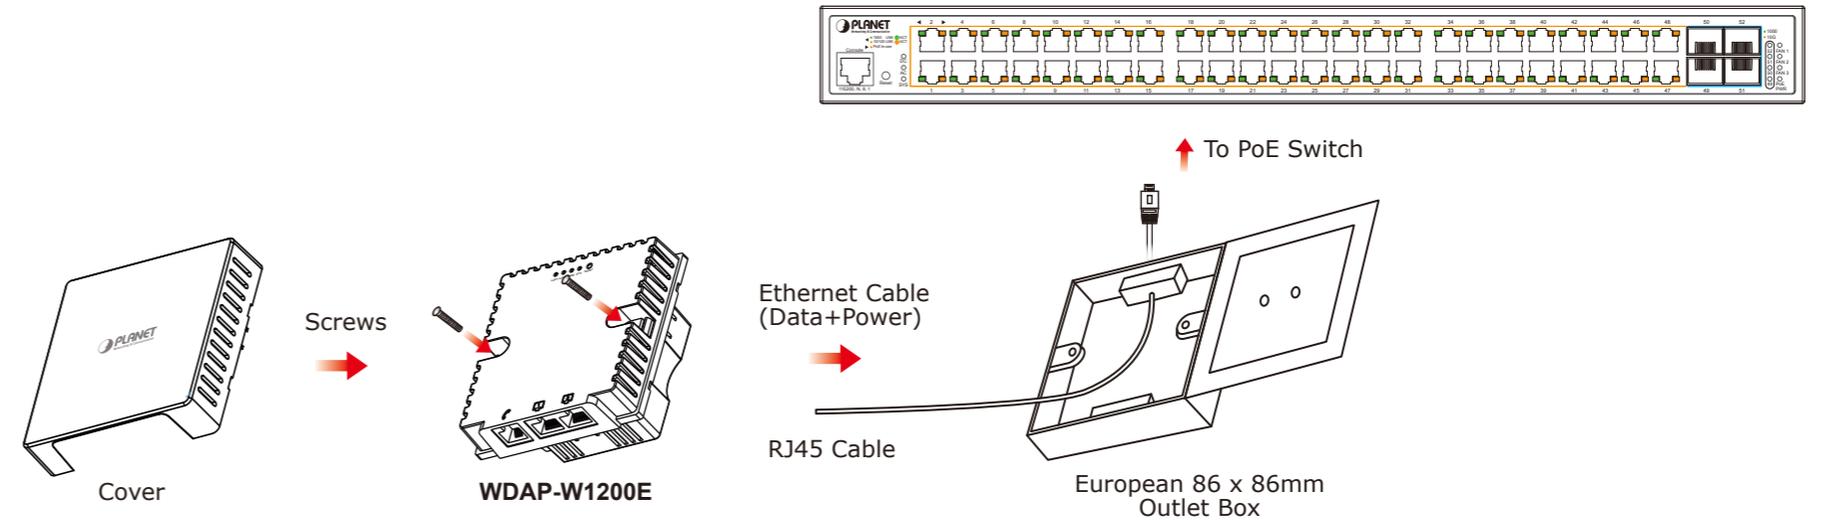

Use the flat-blade screwdriver to take the cover of the WDAP-W1200E off.

Step 2: If you need to build the RJ11 port for phone connection, please follow the figure.

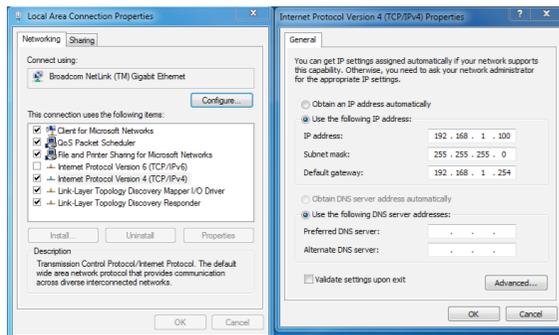

Step 3: Follow the figures below to install the WDAP-W1200E.

4. Wired Network Configuration (Windows 7 and Windows 10)

A computer with wired Ethernet connection is required for the first-time configuration of the Wireless AP.

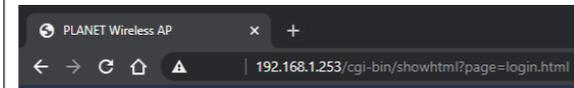

1. Click the **"Start"** button located at the lower-left corner of your computer.
2. Click **"Control Panel"**.
3. Double-click the **"Network and Sharing Center"** icon.
4. Click **"Change Adapter Settings"**.
5. Double-click **"Local Area Connection"**.
6. Select **"Internet Protocol Version 4 (TCP/IPv4)"** and click **"Properties"**.
7. Select **"Use the following IP address"**, and then click the **"OK"** button twice to save the configuration. For example, as the default IP address of the WDAP-W1200E is 192.168.1.253 and the router is 192.168.1.254, you may choose from 192.168.1.1 to 192.168.1.252.

5. Enter into the Web Management

Default IP Address: **192.168.1.253**
 Default Username: **admin**
 Default SSID: **PLANET_2.4G / PLANET_5G**
 Default Wireless Encryption Type: **None**

Step 1: The Web management allows you to access and manage the WDAP-W1200E easily. Launch the Web browser and enter the default IP address <http://192.168.1.253>

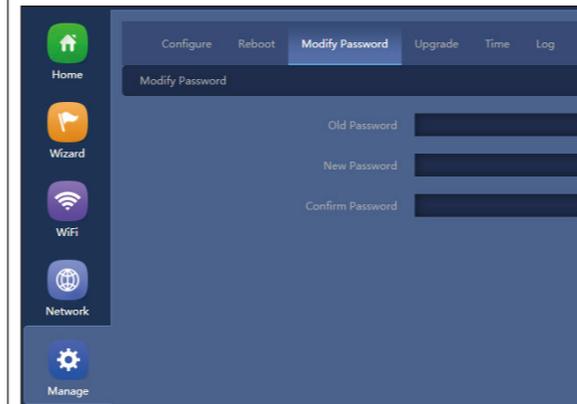

Step 2: When the login window pops up, please enter the password. The default password is **"admin"**. Then click the **LOGIN** button to continue.

For security reasons, it is recommended to change the password at the first login and memorize it.

Step 3: For security reasons, it is strongly recommended to go to **Managed** to configure the Encryption Method and Passphrase of your wireless network.

6. Wireless Network Connection

Step 1: Right-click on the **network icon** displayed in the system tray of your laptop or PC.

Step 2: Highlight the wireless network (SSID) to connect and click the **[Connect]** button.

Step 3: Enter the **encryption key** of the WDAP-W1200E if necessary.

You have already finished the configuration of the WDAP-W1200E. Now you can use your iPhone, iPad, laptop or any other Wi-Fi device to connect with it wirelessly and start surfing the internet.

Further Information:

The above steps introduce the simple installations and configurations of the WDAP-W1200E. For further configurations of different operation modes, please refer to the user manual, which can be downloaded from the website.

Warning:
 This device is compliant with Class A of CISPR 32. In a residential environment this device may cause radio interference.

Energy Saving Note of the Device
 This power required device does not support Standby mode operation. For energy savings, please remove the DC plug or slide the hardware-based Power Switch to the OFF position to disconnect the device from the power circuit. Without removing the DC plug from or switching off the device, the device will still consume power from the power source. In view of Saving the Energy and reducing the unnecessary power consumption, it is strongly suggested to power off or to remove the DC plug from the device if this device is not intended to be active.
