

SD Port Blockers [Without Key] - Pack of 10, White

No.: 40479

Protects SD card slots from unauthorized access

Description

- Provide a visual security deterrent and physically blocks access to an SD card slot
- Quick and simple to use
- 10 x SD port blockers
- Single key & 4 x SD port blockers also available
- 2 Year Warranty

SD Port Blockers can be inserted into SD card ports on memory readers, in cameras, and other devices. These devices provide a visual deterrent to anyone looking to copy data or viruses from, or to, an SD card. SD Port Blockers are available as a set of 1 key and 4 locks, or a pack of 10 additional locks.

The SD Port Blocker is made up of a combined 'key' and 'lock' assembly which plugs into the SD Card. To use, simply plug the 'keylock' into the card slot and release the latch - the lock remains in place! Plug the key back into the lock to remove.

Please Note: these blockers are only effective with recessed SD ports
