

LE400W

IN-EAR HEADPHONES

LINDY
CONNECTION PERFECTION

True wireless earphones with rich bass and incredible clarity

LE400W IN-EAR HEADPHONES

WHAT THEY ARE

Lindy LE400W are modern true wireless in-ear headphones that provide an exceptional listening experience for commuting, exercise, travel, office and home use. Developed using Lindy's years of experience creating award winning wireless audio technology, LE400W are the perfect partner for your music, podcasts, video gaming and calls. Supplied in a compact and stylish case that protects and charges the headphones.

WHAT THEY PROVIDE

SEAMLESS connectivity with an instant, completely wireless connection to your device

DYNAMIC audio playback from premium 6mm high fidelity drivers

INTUITIVE touch control over playback, volume, calls & your virtual assistant

SECURE & comfortable, low profile, lightweight design

LONG-LASTING battery life with up to 4 hours of non-stop listening, and an extra 12 hours using the charging case

WHY YOU NEED THEM

- **POWERFUL.** With around 4 hours in-built battery life, and an additional 12 hours of charge via the magnetised case, enough for even the longest of commutes or a long-haul flight. The LE400W can be quickly charged to 80% in around 1 hour, ensuring quick and uninterrupted access to your audio.
- **COMPLETELY WIRE-FREE.** True wireless connectivity that will pair instantly to your device when removed from their case via Bluetooth 5.0 technology. Simultaneous transmission for both stereo and mono playback.
- **IMMERSIVE.** 6mm high fidelity drivers ensure dynamic audio playback. Rich, solid bass. Superb clarity and sparkling, smooth treble. The LE400W ensures superior audio performance for all types of content from music and podcasts to movies and games.
- **COMFORTABLE.** With a lightweight and secure design, the LE400W have been engineered to provide an optimum, relaxing fit for all ear types while ensuring great audio playback.

WHAT'S IN THE BOX

TRUE AUDIO FREEDOM

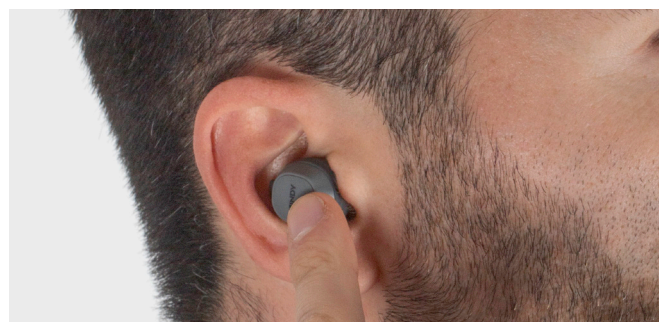

Bluetooth 5.0 technology provides a fast, wireless connection to your device. Remove from the case and the LE400W will initiate pairing automatically.

Simultaneous transmission provides connectivity to each bud, allowing for seamless stereo use, or even mono use of one bud at a time to hear your gym partner or listen out for announcements.

Premium 6mm high fidelity, neodymium dynamic drivers provide deep bass at all levels and clear separation of mids, lows and highs. These drivers also benefit from a thinner, mylar (PET) diaphragm giving greater stability and consistency in the musical performance.

Simple and seamless touch control allows for fast management over your music, the volume, or your connected voice assistant.

IN THE OFFICE – AT HOME OR AT WORK

In-built microphones provide clarity for the listener over video or voice calls. Calls can be answered or ended at the touch of a button. The LE400W's snug design provides great noise isolation for those times when focus is required.

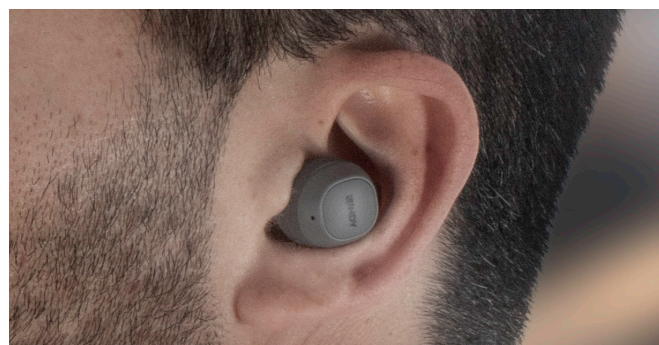

IN THE GYM OR ON A RUN

The twist & lock design and innovative earphone wing ensures the LE400W are secure during even the toughest workout. A simple tap pauses audio for hearing your training partner, or alternatively store either of the LE400W earbuds safely in the charging case and continue the workout using a single earphone, while the other charges securely in its case. An IPX5 rating provides water & sweat resistance, ideal for workouts in the rain or even the most gruelling of classes.

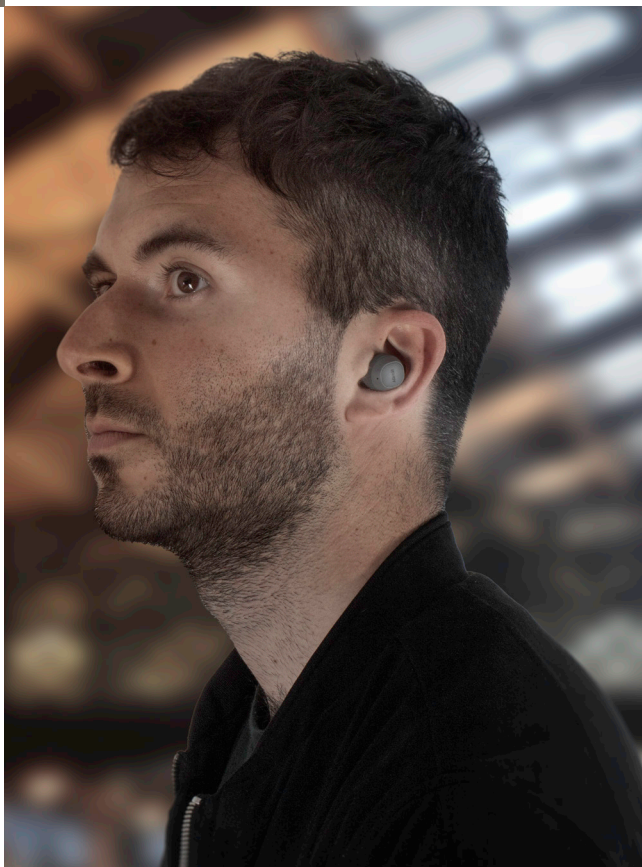

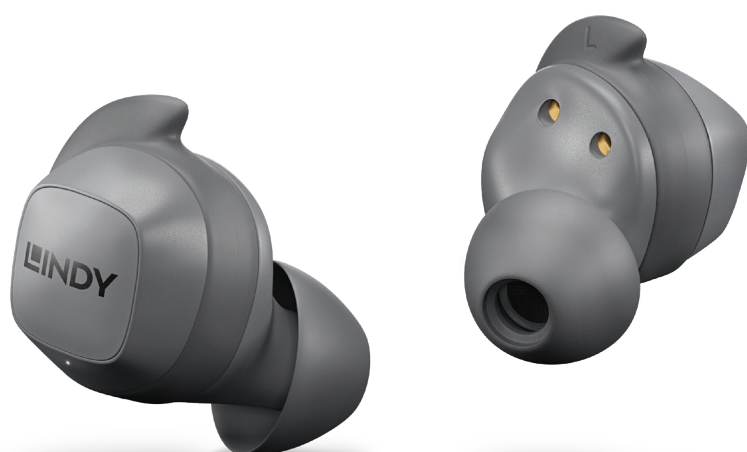

FOR EVERYDAY USE

The LE400W are ultra-versatile and provide an effective, dynamic listening experience at home or for general entertainment. The impressive sound performance is perfect for playback of a wide variety of music types, action packed movies or thought-provoking audiobooks. The long-lasting comfort ensures there is no discomfort even when binge-watching your favourite series while the low latency connection ensures video and audio are always in sync.
